## Installation

Proper installation is crucial for the safe and optimal performance of your microwave drawer oven. This appliance is designed for built-in installation under a counter or in a wall cabinet. Ensure the installation area meets the specified dimensions and electrical requirements.

## Cutout Dimensions

The required cutout dimensions for installation are:

- **Width:** 22.5 inches
- **Height:** 15 inches
- **Depth:** 23 inches

A minimum clearance of 3 inches between the microwave and the outer wall is required for proper ventilation.

## Electrical Requirements

The unit is powered by 120 volts and requires a 15 amp circuit with a three-pronged outlet.

## Installation Steps

1. Prepare the cabinet cutout according to the specified dimensions.
2. Ensure the power cord is accessible and can reach the outlet. The power cord is located on the left side of the unit and extends to 53 inches.
3. Plug the unit into a grounded 120V, 15A outlet.
4. Gently slide the microwave drawer oven into the prepared cutout frame.
5. Secure the microwave to the cabinet using the provided mounting brackets and screws.

## Maintenance

Regular cleaning and maintenance will ensure the longevity and optimal performance of your microwave drawer.

oven.

- **Interior Cleaning:** Wipe the interior with a damp cloth and mild detergent after each use. For stubborn stains, place a bowl of water with lemon slices inside and microwave for a few minutes to loosen food particles.
- **Exterior Cleaning:** Clean the stainless steel exterior with a soft cloth and a non-abrasive stainless steel cleaner. Avoid harsh chemicals or abrasive pads.
- **Control Panel:** Wipe the glass touch control panel with a soft, damp cloth. Do not spray cleaners directly onto the panel.
- **Drawer Rails:** Keep the drawer rails free of food debris to ensure smooth operation.

## Troubleshooting

Before contacting customer service, please refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Oven does not start	Power cord not plugged in; circuit breaker tripped; door not closed properly.	Ensure plug is secure; reset circuit breaker; close door firmly.
Food not heating evenly	Improper stirring; food density; incorrect power level.	Stir food during cooking; use appropriate power level for food type.
Drawer not opening/closing	Obstruction in drawer path; control panel issue.	Check for obstructions; try pressing the OPEN/CLOSE buttons again.
