3. PACKAGE CONTENTS

Before beginning assembly, ensure all parts listed below are present and undamaged. If any parts are missing or damaged, please contact customer support.

- 1 x 4ft6 Metal Bed Frame (components for headboard, footboard, side rails, and support legs)
- 1 x Accessory Kit (includes all necessary bolts, screws, nuts, and an Allen key)
- 1 x Instructions Manual
- Slats (pre-attached or separate, as per design)

4. ASSEMBLY INSTRUCTIONS

Follow these steps carefully to assemble your Yaheetech Metal Bed Frame. It is recommended to assemble on a soft, clean surface to prevent scratches.

1. **Unpack and Identify Parts:** Carefully unpack all components and lay them out. Refer to the parts list in your included instruction manual to identify each piece.

Image: An exploded view diagram showing all individual metal components of the bed frame, including the headboard, footboard, side rails, and support slats, before assembly.

2. **Assemble Headboard and Footboard:** Connect the horizontal bars to the vertical posts of the headboard and footboard using the provided hardware. Ensure all connections are secure but do not fully tighten until the frame is complete.
3. **Attach Side Rails:** Connect the side rails to the assembled headboard and footboard. Align the holes and insert the bolts, tightening them partially.
4. **Install Center Support:** Attach the center support rail(s) and legs (if applicable) to the frame. This provides crucial

stability.

5. **Secure Slats:** Place the metal slats onto the designated slots or supports on the side rails. Ensure each slat is properly aligned and secured.

7. TROUBLESHOOTING

If you encounter any issues with your bed frame, refer to the common problems and solutions below:

Problem	Possible Cause	Solution
Bed frame is wobbly or unstable.	Loose bolts or screws.	Re-tighten all bolts and screws. Ensure all connections are secure.
Squeaking noises.	Loose connections or friction between metal parts.	Check and tighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to connection points if squeaking persists.
Mattress slides on the frame.	Mattress not properly seated or anti-slip baffles not effective.	Ensure the mattress is centered on the frame. If sliding continues, consider placing a non-slip mat between the mattress and the slats.
Missing parts during assembly.	Packaging error.	Contact Yaheetech customer support with your purchase details and a list of missing parts.
