MWrouqfur X284217AAA

MWrouqfur Pyramid Patio Heater User Manual

Model: X284217AAA

1. IMPORTANT SAFETY INFORMATION

Please read and understand all safety warnings and instructions before assembling, operating, or servicing this patio heater. Failure to follow these instructions may result in fire, explosion, property damage, personal injury, or death.

General Safety Guidelines:

- For outdoor use only. Do not operate indoors or in enclosed spaces.
- Maintain adequate clearance from combustible materials: minimum 3 feet from sides and 3 feet from top.
- Always operate on a firm, level surface.
- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- Keep children and pets away from the heater.
- Never leave the heater unattended when in use.
- Ensure the propane tank is securely connected and free of leaks before operation.

Integrated Safety Features:

- **Flameout Protection:** Automatically shuts off the gas supply if the flame extinguishes.
- **Overtured Protection (Anti-tilt):** The heater is equipped with a safety switch that automatically shuts off the unit if it tilts over 45 degrees.
- **Anoxic Protection:** Monitors oxygen levels and shuts off the heater if levels become unsafe.

2. PRODUCT OVERVIEW

The MWrouqfur Pyramid Patio Heater is designed to provide warmth and ambiance for outdoor spaces. Featuring a distinctive pyramid style with a visible flame tube, it offers both efficient heating and an attractive visual element. Constructed from durable stainless steel, this portable heater is suitable for various outdoor settings.

Key Features:

- **Pyramid Design:** High glass tube design showcases a captivating flame, enhancing the outdoor atmosphere.
- **Efficient Heating:** Delivers 42,000 BTU, providing omnidirectional heating for up to 115 square feet.
- **Metal Reflector Shield:** An umbrella-shaped reflector at the top helps direct heat downwards, maximizing coverage and energy efficiency.
- **Portability:** Equipped with two casters at the base for easy movement and repositioning.
- **Durable Construction:** Primarily made of stainless steel, with aluminum and iron spray plastic components for flexibility and longevity.

3. COMPONENTS AND PARTS

Familiarize yourself with the main components of your patio heater:

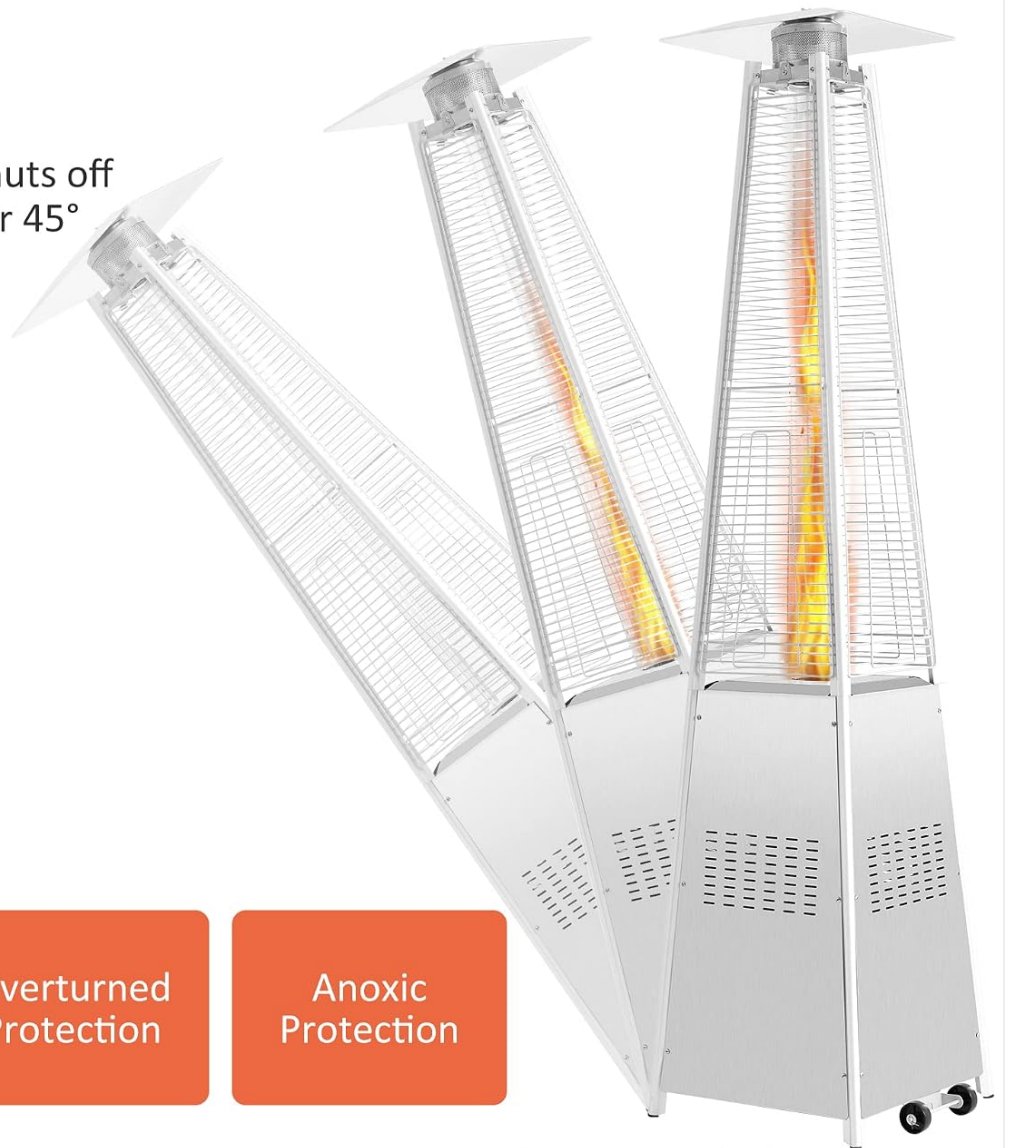

- **Top Protection Net Cover:** Located at the top, designed for safety.
- **Glass Tube:** Houses the flame, providing visual appeal and heat.
- **Burner Assembly:** Where the propane is ignited.
- **Control Knob:** For ignition, flame adjustment (Hi/Lo), and turning off the heater.
- **Dumping Protection Device:** Safety mechanism for tilt shut-off.
- **Propane Tank Compartment:** Located in the base, designed to hold a standard propane tank.
- **Wheels:** Two casters for easy mobility.

- **304 Stainless Steel Construction:** Main body material for durability.

4. SETUP AND ASSEMBLY

Assembly of this patio heater typically requires two adults and takes approximately one hour. A detailed installation instruction manual with clear and logical illustrations is included in the product package. Please refer to this manual for step-by-step guidance.

General Assembly Steps (Refer to included manual for details):

1. Unpack all components and verify against the parts list in your manual.
2. Assemble the base and attach the wheels.
3. Install the main body panels and the propane tank compartment door.
4. Carefully install the glass tube and protective grilles.
5. Mount the burner assembly and top reflector.
6. Connect the gas hose to the burner assembly.
7. Place a standard 20 lb propane tank (not included) into the base compartment and connect the regulator hose. Ensure all connections are tight and perform a leak test as described in your manual.

Note: Assembly tools and hardware are included in the package. A propane tank and battery for the igniter are not included and must be purchased separately.

5. OPERATING INSTRUCTIONS

Before First Use:

- Ensure the heater is on a stable, level surface.
- Verify all gas connections are secure and free of leaks.
- Confirm adequate clearance from combustible materials.
- Open the valve on your propane tank.

Igniting the Heater:

1. Turn the control knob to the 'OFF' position.
2. Push in and turn the control knob counter-clockwise to the 'PILOT' position.
3. While holding the knob in, press the igniter button repeatedly until the pilot flame lights. You may need to hold the knob in for 30-60 seconds after ignition to allow the thermocouple to heat up.
4. Once the pilot flame is stable, release the control knob.
5. Slowly turn the control knob counter-clockwise to the 'HI' position to ignite the main burner.
6. Adjust the flame intensity by turning the control knob between 'HI' and 'LO' as desired.

Turning Off the Heater:

1. Turn the control knob clockwise to the 'OFF' position.
2. Close the valve on the propane tank.

6. MAINTENANCE

Regular maintenance ensures safe and efficient operation of your patio heater.

Cleaning:

- Always ensure the heater is off, cooled down, and the propane tank valve is closed before cleaning.
- Wipe exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Keep the burner and pilot assembly clean and free of debris. Use compressed air if necessary.
- Clean the glass tube periodically with a glass cleaner suitable for high temperatures.

Storage:

- Disconnect the propane tank and store it in a well-ventilated area, away from direct sunlight and heat sources.
- Cover the heater with a weather-resistant cover to protect it from the elements when not in use.
- Store the heater in a dry, protected location.

7. TROUBLESHOOTING

If you encounter issues with your patio heater, refer to the following common troubleshooting steps:

- **Heater will not ignite:**

- Check if the propane tank valve is fully open.
- Ensure there is propane in the tank.
- Verify the igniter battery is correctly installed and functional.
- Check for blockages in the pilot or burner assembly.

- **Pilot flame will not stay lit:**

- Ensure you are holding the control knob in for sufficient time (30-60 seconds) after ignition to allow the thermocouple to heat up.
- Check for proper gas pressure from the tank.

- **Main burner will not light after pilot is lit:**

- Ensure the control knob is turned fully to the 'HI' position.
- Check for any obstructions in the main burner.

- **Heater shuts off unexpectedly:**

- Check if the heater has been tilted (anti-tilt safety feature activated).
- Verify the propane tank is not empty.
- Ensure adequate ventilation to prevent anoxic shutdown.

If problems persist after attempting these steps, please contact customer support.

8. SPECIFICATIONS

Size
