4. ASSEMBLY INSTRUCTIONS

The WLIVE Coffee Table is designed for straightforward assembly. Please follow the included detailed assembly instructions, which come with clearly marked parts and the necessary installation tool. It is recommended to have two people for assembly to ensure ease and safety, with an estimated assembly time of 30 minutes.

Before You Begin:

- Unpack all components and verify against the parts list in your assembly guide.
- Ensure you have enough clear space for assembly.
- Keep small parts out of reach of children.

Important Assembly Tip:

Some users have reported that steps 15 and 16 in the assembly manual can be misleading, specifically regarding the orientation of the table top and hinge installation. If you encounter issues with the table not closing completely after installing the hinge with lift rods, try rotating the table 180 degrees before attaching these components. Always refer to the included physical manual for the most accurate and up-to-date instructions.

Choosing Your Base:

Your coffee table comes with two options for its base: four caster wheels for mobility or four adjustable feet for stationary placement. Decide which option best suits your needs before proceeding with the relevant assembly steps.

5. OPERATING INSTRUCTIONS

Using the Lift-Top Mechanism:

1. To raise the tabletop, gently lift the front edge of the table. The hydraulic mechanism will assist in smoothly raising the top to its elevated position.
2. To lower the tabletop, apply gentle downward pressure on the front edge. The soft-close mechanism will ensure a controlled and quiet descent.
3. Avoid placing excessive weight (over 11 lbs) on the lift-top when it is raised to prevent strain on the mechanism.

Accessing Storage:

- The hidden compartment is accessible when the lift-top is raised. This space is ideal for storing items you want out of sight, such as remotes, magazines, or small electronics.
- The two open shelves below the main compartment provide easy access storage for books, decorative items, or other frequently used belongings.

Utilizing Mobility (if casters installed):

- If you have installed the caster wheels, the table can be easily moved across flat surfaces.
- To lock the table in place, engage the brakes on the caster wheels (if applicable).
- When moving the table, ensure the lift-top is fully closed and any items on the shelves are secure to prevent spills or damage.

6. CARE AND MAINTENANCE

- **Cleaning:** To clean the coffee table, simply wipe surfaces with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish.
- **Spills:** Promptly wipe up any spills to prevent staining, especially on the wooden surfaces.
- **Mechanism Care:** The lift mechanism is designed for durability. Avoid forcing the top up or down. If the mechanism feels stiff, ensure no obstructions are present. Do not apply lubricants unless specifically instructed by WLIVE customer support.
- **Weight Distribution:** Distribute weight evenly on the tabletop and within storage compartments to maintain stability and prevent warping.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Lift-top is wobbly or unstable when raised.	Loose screws in the lift mechanism or frame. Uneven weight distribution.	Check and tighten all screws connecting the lift mechanism to the tabletop and the main frame. Ensure weight on the top is within the 11 lbs limit and evenly distributed.
Lift-top does not close completely or is crooked.	Incorrect assembly of the hinge/lift rods (refer to assembly tip in Section 4). Obstruction in the mechanism.	Review assembly steps 15 and 16. Ensure no items are blocking the mechanism or hidden compartment. Gently guide the top down with both hands.
Caster wheels do not roll smoothly or drag on carpet.	Wheels are locked. Obstruction in the wheel mechanism. Design of the wheel may catch on thick carpet.	Unlock the caster wheels. Clear any debris from the wheels. For thick carpets, consider using the adjustable feet option or a protective mat.
Table feels unstable overall.	Loose frame connections. Uneven floor.	Ensure all frame screws are securely tightened. If using adjustable feet, adjust them to level the table on uneven surfaces.
