### 3. INSTALLATION INSTRUCTIONS

Follow these steps to correctly install your VITILAN Front and Rear Baskets. Ensure your ebike is stable and powered off before beginning installation.

#### 3.1 Front Basket Installation

1. **Position the Front Basket:** Carefully align the front basket with the mounting points on the front rack of your VITILAN U7 ebike. Ensure the basket is oriented correctly with the VITILAN logo facing forward.
2. **Secure with Screws:** Use the provided screws and nuts to attach the front basket to the ebike's front rack. Insert the screws through the designated holes and fasten them securely with the nuts using the supplied wrench. Do not overtighten.

Image: A detailed view of the front basket securely mounted on the ebike's front rack, showing the attachment points.

#### 3.2 Rear Basket Installation

1. **Position the Rear Basket:** Place the rear basket onto the rear rack of your VITILAN U7 ebike. Ensure proper alignment with the mounting holes on the rack.
2. **Secure with Screws:** Insert the remaining screws through the basket and rack holes. Attach the nuts

and tighten them with the wrench. Verify that the basket is firmly attached and does not wobble.

Image: A close-up shot of the rear basket mounted on the e-bike's rear rack, highlighting the secure fastening.

## 4. OPERATING INSTRUCTIONS

The VITILAN baskets are designed for carrying various items. Observe the following guidelines for optimal use:

- **Load Capacity:** The baskets have a load capacity of 10 kg (22 lbs). Do not exceed this weight limit to ensure stability and safety.
- **Weight Distribution:** Distribute weight evenly within the baskets. For the front basket, avoid placing excessively heavy items that could affect steering.
- **Securing Items:** For bumpy rides or to prevent items from falling out, consider using bungee cords or a cargo net to secure your belongings within the baskets.

Image: The front and rear baskets shown in practical use, carrying various items like flowers, demonstrating their utility.

## 5. MAINTENANCE

---

To ensure the longevity and continued performance of your VITILAN baskets:

- **Regular Cleaning:** Wipe down the baskets with a damp cloth to remove dirt and debris. For stubborn grime, use a mild soap solution and rinse thoroughly.
- **Inspect Fasteners:** Periodically check all screws and nuts to ensure they remain tight. Retighten as necessary to prevent loosening during rides.
- **Corrosion Prevention:** The baskets are made of iron. While durable, prolonged exposure to moisture can lead to rust. Dry the baskets thoroughly after exposure to rain or washing.

## 6. TROUBLESHOOTING

---

If you encounter any issues with your VITILAN baskets, consider the following:

- **Basket Wobbles:** This is typically caused by loose fasteners. Re-check and tighten all screws and nuts securing the basket to the ebike rack.

- **Difficulty Installing:** Ensure you are using the correct screws for each mounting point. Refer to the installation video and images for visual guidance. If issues persist, verify compatibility with your specific VITILAN ebike model.

## 7. SPECIFICATIONS

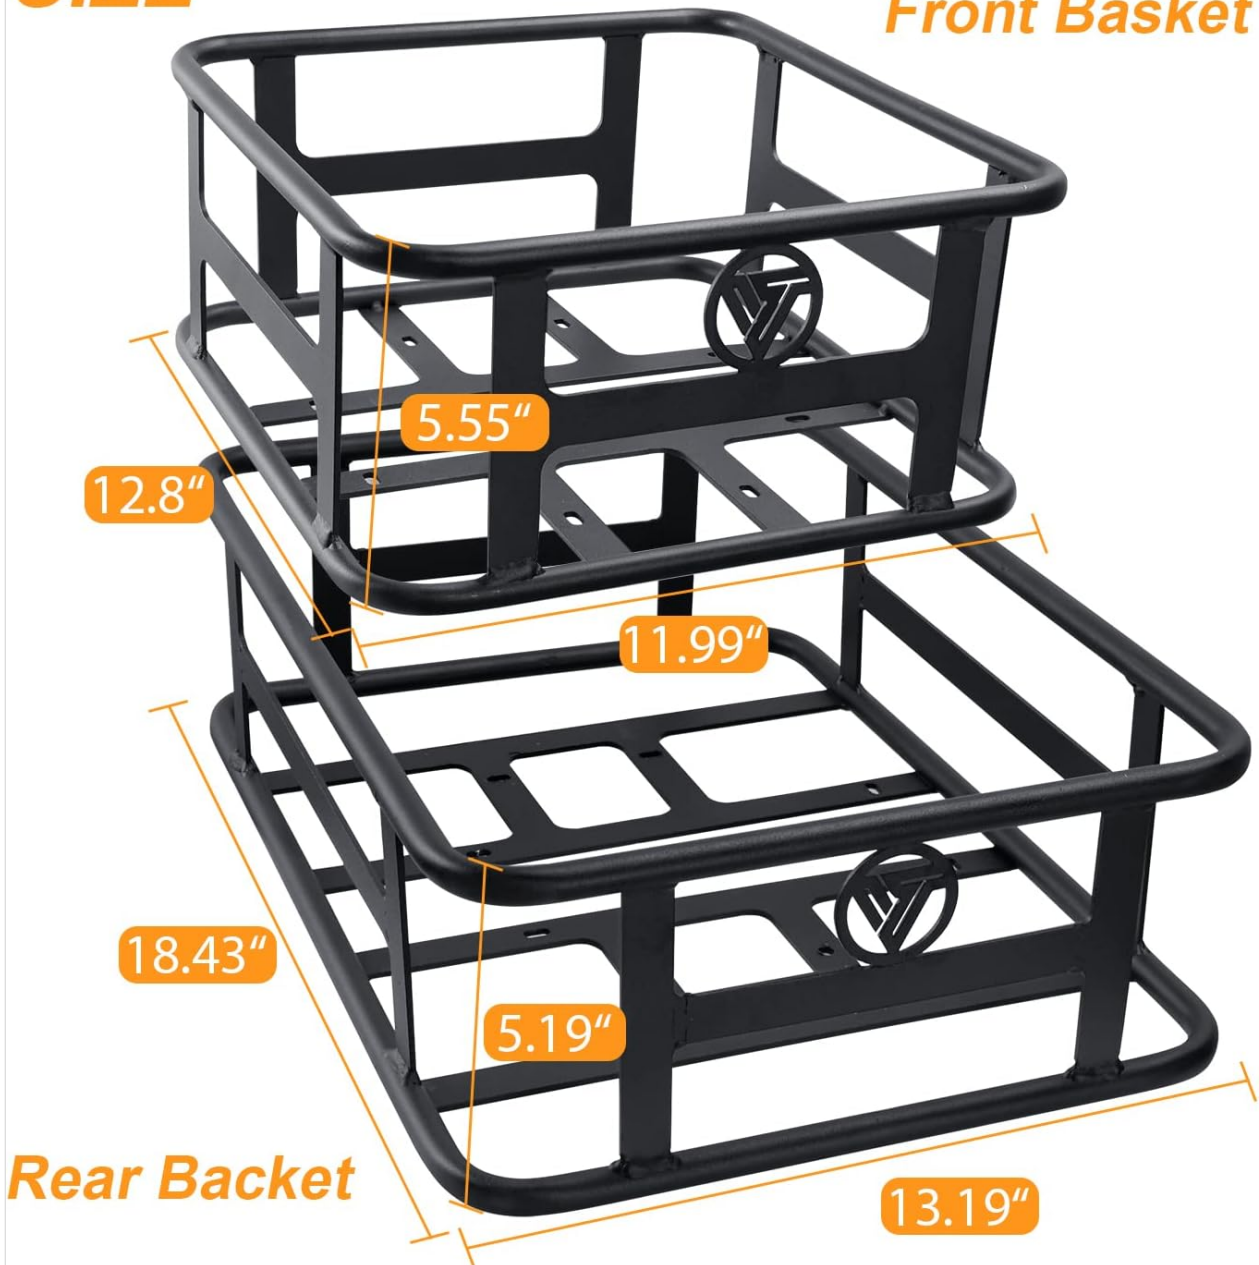

---

Feature	Detail
Brand	VITILAN
Model Number	VITILANU7Basket
