SETUP AND PREPARATION

Upon receiving your Pokémon Magnezone V & VSTAR cards, it is recommended to handle them with care to preserve their condition. These cards are ready for immediate integration into a Pokémon TCG deck or for display as part of a collection.

- **Inspection:** Carefully inspect both cards for any manufacturing defects or shipping damage.
- **Sleeving:** For optimal protection during gameplay and storage, place each card into a protective card sleeve.
- **Deck Integration:** If using for gameplay, ensure your deck adheres to official Pokémon TCG rules regarding card limits and types.

MAINTENANCE AND CARE

Proper care ensures the longevity and value of your trading cards.

- **Storage:** Store cards in a cool, dry place away from direct sunlight and extreme temperatures. Use card binders, top loaders, or display cases for long-term storage.
- **Handling:** Always handle cards by their edges to avoid transferring oils from your skin, which can degrade the card surface over time.
- **Cleaning:** Do not use liquids or abrasive materials to clean the cards. For light dust, a soft, dry microfiber cloth can be used gently.

TROUBLESHOOTING

While trading cards are generally straightforward, here are common concerns and resolutions:

- **Damaged Card Upon Arrival:** If cards arrive damaged, document the condition with photographs and contact the seller or distributor immediately.
- **Authenticity Concerns:** If you suspect a card is not authentic, compare it with known genuine cards from official sources. Consult with reputable card dealers or collectors for verification.
- **Gameplay Rule Disputes:** Refer to the official Pokémon TCG rulebook or official online resources for clarification on specific card interactions or game mechanics.
