## MUBVIEW PK320

# MUBVIEW PK320 2K Indoor Security Camera Instruction Manual

Model: PK320

### PRODUCT OVERVIEW

The MUBVIEW PK320 is a versatile 2K indoor security camera designed for comprehensive home monitoring. It features 2K Super HD live streaming, 360° pan and tilt functionality, smart motion tracking, two-way audio, and enhanced night vision. This camera supports both 2.4GHz and 5GHz Wi-Fi networks, offering flexible connectivity options. It is ideal for monitoring pets, babies, or general home security, providing instant alerts and continuous recording capabilities.

### WHAT'S IN THE BOX

- MUBVIEW PK320 2K Indoor Security Camera

- USB Power Cable
- Power Adapter (Charger)
- Mounting Bracket
- Mounting Screws and Wall Anchors
- User Manual

## **SETUP GUIDE**

### **1. Download and Install the App**

The MUBVIEW camera operates via a dedicated mobile application available for both Android and iOS devices. Scan the QR codes below or search for "Mubview" in your device's app store to download the app.

# Quick and Easy Setup

**1**

Download the Mubview APP

**2**

Power on and connect it to 2.4/5GHz wifi

**3**

Place anywhere

iOS

Android

## 2. Account Registration

Open the Mubview app and sign up with your email address. Choose your region and country code. If you already have an account, simply log in.

## 3. Power On the Device

Connect the USB power cable to the camera and plug the power adapter into a wall outlet. The camera will automatically power on and begin its initialization sequence, which includes rotating its lens. Wait for the camera to complete its initialization.

Video: A step-by-step guide on how to set up and use the Mubview Smart PTZ Indoor Camera, including app installation and initial power-on sequence.

## 4. Device Pairing and Wi-Fi Setup

Follow the in-app instructions to pair your camera. This typically involves:

1. Allowing the app to use Bluetooth for device discovery.
2. Resetting the device by holding the reset button (if prompted) until the indicator light flashes red.
3. Selecting your 2.4GHz Wi-Fi network (5GHz networks are not supported for direct connection) and entering the password.
4. Scanning a QR code displayed on your phone with the camera lens. Keep your phone 5-8 inches from the lens for successful scanning.
5. Confirming network connection and device addition.

Ensure your camera is placed near your Wi-Fi router for the best signal during setup.

## OPERATING INSTRUCTIONS

### 2K Resolution & 360° Coverage

The MUBVIEW PK320 provides a 2K Super HD live stream for clear monitoring. Use the app to control the camera's pan (355° horizontally) and tilt (80° vertically) to view every angle of your home.

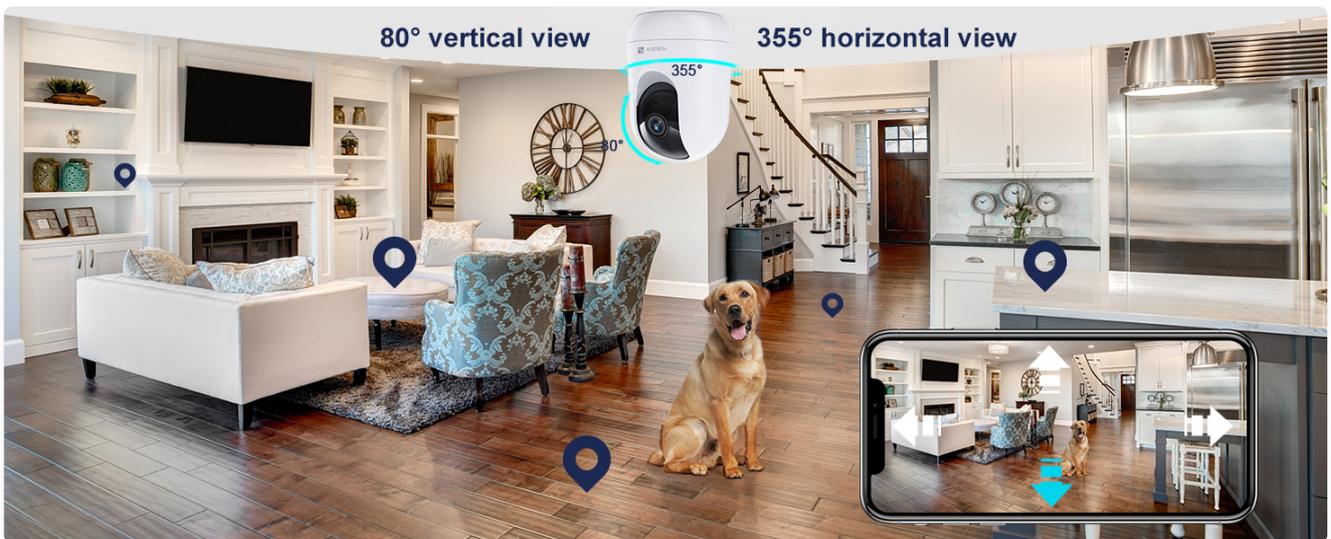

Image: A wide-angle view of a living space with the MUBVIEW camera, illustrating its 360° coverage with 355° horizontal and 80° vertical rotation.

### Smart Tracking & Instant Message Alerts

Activate intelligent tracking in the app to have the camera automatically follow moving people or objects, recording the activity in real-time. With body detection enabled, the camera will send instant notifications to your phone when motion is detected, keeping you informed of events in your home, office, or store.

Image: The MUBVIEW PK320 camera tracking a child and a dog in a living room, demonstrating its advanced motion tracking capabilities.

### 24/7 Remote Monitoring & Two-Way Audio

Monitor your home remotely 24/7 through the app. The two-way audio feature allows you to not only hear sounds from your home but also speak through the camera to communicate with family members or comfort pets. This is particularly useful when you are away at work or traveling.

### Night Vision

The camera is equipped with excellent night vision capabilities, providing clear 5MP clarity even in dark rooms. This ensures continuous monitoring day and night.

## Multi-device Viewing & Sharing

The Mubview app supports adding multiple surveillance cameras and displaying up to four live video feeds simultaneously. You can also share access to the camera with up to 4 devices, allowing family members to view memorable moments.

## TROUBLESHOOTING

- **Camera Not Powering On:** Ensure the power cable is securely connected to both the camera and the power adapter, and the adapter is plugged into a working wall outlet.
- **Wi-Fi Connection Issues:** The camera supports 2.4GHz Wi-Fi. If you have a dual-band router, ensure your phone is connected to the 2.4GHz network during setup. Keep the camera close to the router during pairing.
- **Unable to Find Reset Button:** The reset button is typically located on the camera body, sometimes requiring the lens to be rotated to expose it. Refer to the user manual diagram for its exact location.
- **SD Card Not Detected:** Ensure the TF (microSD) card is inserted correctly into the designated slot. The camera supports up to 128GB.
- **Motion Alerts Not Received:** Check app notification settings on your phone and within the Mubview app to ensure alerts are enabled.
