BUFFALO BRXL-PUS6U3B

BUFFALO MediaStation 6X Portable Blu-ray Drive User Manual

Model: BRXL-PUS6U3B

INTRODUCTION

The BUFFALO MediaStation 6X Portable Blu-ray Drive (Model: BRXL-PUS6U3B) is a versatile external optical drive designed for use with both Windows and Mac computers. This compact and lightweight device allows you to play and burn Blu-ray discs, DVDs, and CDs, providing a comprehensive solution for your optical media needs. It features USB 3.2 (Gen 1) connectivity with both Type-A and Type-C adapters for broad compatibility.

PACKAGE CONTENTS

Verify that all items are present in the package:

- BUFFALO MediaStation 6X Portable Blu-ray Drive
- USB 3.2 (Gen 1) Type-A Cable
- USB Type-A to Type-C Adapter
- User Manual (this document)

SETUP

Connecting the Drive

The drive is bus-powered, meaning it draws power directly from your computer's USB port. No external power adapter is required.

1. Locate an available USB port on your computer (USB Type-A or Type-C).
2. Connect the provided USB 3.2 (Gen 1) Type-A cable to the drive.
3. If your computer has a USB Type-C port, attach the USB Type-A to Type-C adapter to the Type-A end of the cable, then connect it to your computer. If your computer has a USB Type-A port, connect the cable directly.
4. The operating system should automatically detect and install the necessary drivers for the drive.

Software Installation

The drive includes CyberLink Media Suite software for playback and burning of Blu-ray discs, DVDs, and CDs on PC. For Mac users, third-party software may be required for Blu-ray playback and burning.

1. Refer to the included software documentation or the manufacturer's website for instructions on downloading and installing the CyberLink Media Suite.
2. Ensure your computer meets the minimum system requirements for the software.

BURN & READ BD/DVD/CD

PLAYBACK AND BURNING SOFTWARE INCLUDED

PC software included to save money and hassle

OPERATING INSTRUCTIONS

Playing Discs

1. Press the eject button on the front of the drive to open the disc tray.
2. Carefully place the Blu-ray, DVD, or CD onto the disc tray with the label side facing up.
3. Gently push the disc tray back into the drive until it clicks shut.
4. Your operating system or media playback software should automatically detect the disc. Follow the on-screen prompts to play the content.

Burning Discs

To burn data or media to a Blu-ray, DVD, or CD, you will need compatible burning software (e.g., CyberLink Media Suite).

1. Insert a blank, recordable disc (BD-R, BD-RE, DVD-R, DVD+R, CD-R, CD-RW, M-DISC) into the drive as described above.
2. Open your disc burning software.

3. Select the type of project you wish to create (e.g., data disc, video disc, audio CD).

4. Add the files or media you want to burn to the project.

5. Follow the software's instructions to start the burning process. Ensure the process is not interrupted.

MAINTENANCE

To ensure optimal performance and longevity of your BUFFALO MediaStation drive, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry, lint-free cloth to wipe the exterior of the drive. Do not use liquid cleaners or abrasive materials. Avoid touching the optical lens inside the disc tray.
- **Disc Handling:** Always handle discs by their edges. Avoid touching the recording surface. Store discs in their cases when not in use to prevent scratches and dust accumulation.
- **Storage:** Store the drive in a cool, dry place away from direct sunlight and extreme temperatures.
- **Ventilation:** Ensure the drive's ventilation openings are not blocked during operation to prevent overheating.

TROUBLESHOOTING

If you encounter issues with your BUFFALO MediaStation drive, refer to the following common problems and solutions:

Common Issues and Solutions

Problem	Possible Cause / Solution
Drive not recognized by computer	- Ensure the USB cable is securely connected to both the drive and the computer. - Try a different USB port on your computer. - Try a different USB cable if available. - Restart your computer. - Check Device Manager (Windows) or System Information (Mac) to see if the drive is listed.
Disc not playing or burning	- Ensure the disc is clean and free of scratches or smudges. - Verify that the disc is inserted correctly (label side up). - Check if your playback/burning software is compatible with the disc format and is up-to-date. - For Blu-ray playback, ensure you have compatible software and codecs installed. - Try a different disc to rule out a faulty disc.
Slow read/write speeds	- Ensure you are using a USB 3.0/3.2 port for optimal performance. Connecting to a USB 2.0 port will result in slower speeds. - Close other applications that might be consuming system resources. - Ensure your computer's drivers are up-to-date.
Drive eject button not working	- If a disc is currently being accessed by software, you may need to eject it through the software interface first. - Ensure the drive is properly connected and powered.

If the issue persists after trying these solutions, please contact BUFFALO customer support.

SPECIFICATIONS

Product Specifications

Feature	Detail
Brand	BUFFALO

Feature	Detail
Model Number	BRXL-PUS6U3B
Hardware Platform	Mac, PC
Operating System Compatibility	macOS, Windows
Item Weight	15.2 ounces (approx. 431g)
Product Dimensions (LxWxH)	5.8 x 5.4 x 0.6 inches (approx. 14.7 x 13.7 x 1.5 cm)
