JOOM Tripod Clothes Drying Rack Instruction Manual

Model: 06

1. Introduction

Thank you for choosing the JOOM Tripod Clothes Drying Rack. This manual provides essential information for the proper setup, operation, and maintenance of your new drying rack. Please read these instructions carefully before use to ensure optimal performance and longevity of the product.

2. Product Overview

The JOOM Tripod Clothes Drying Rack is designed for efficient and convenient air drying of garments. Its foldable design allows for compact storage, making it suitable for various living spaces. The rack features a stable tripod structure and multiple drying rods, offering ample space for your laundry.

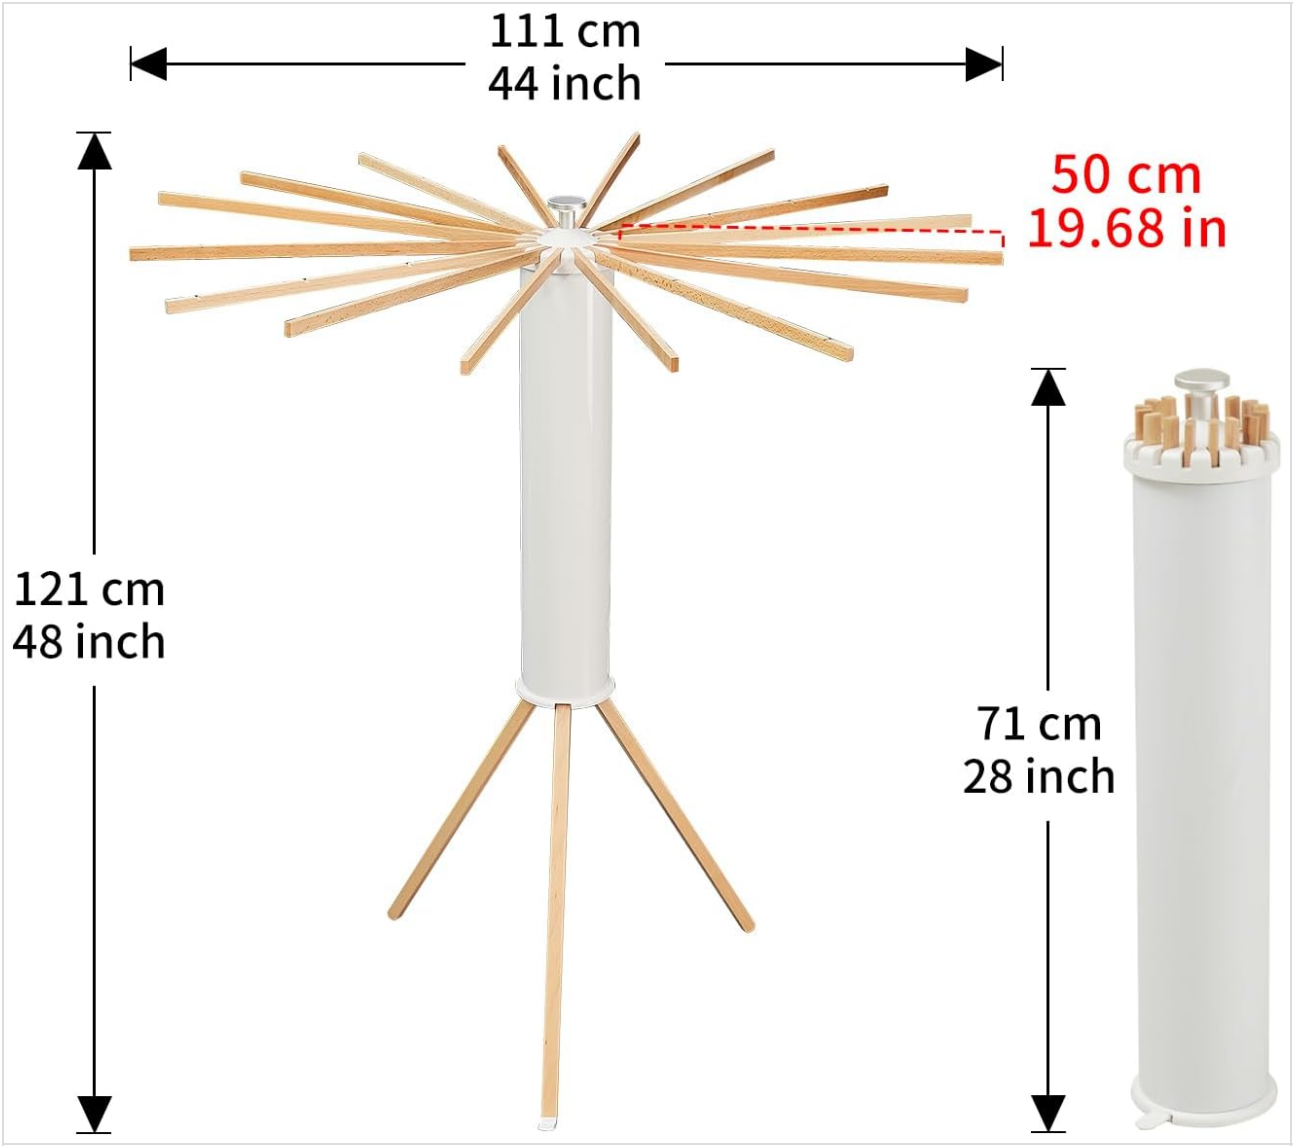

Figure 2.2: This image illustrates the key dimensions of the drying rack, including its height and width when fully open (48 inches high, 44 inches wide) and its compact folded height (28 inches).

3. Setup Instructions

The JOOM Tripod Clothes Drying Rack requires minimal assembly. Follow these steps for initial setup:

1. **Unpack Components:** Carefully remove all parts from the packaging.
2. **Extend Legs:** Locate the base of the rack. Rotate the plastic cover at the bottom to unlock the legs. Gently pull the legs outwards to form the stable tripod structure. Ensure all three legs are fully extended and locked into position for maximum stability.
3. **Adjust Height (if applicable):** Some models may feature adjustable leg heights. If so, extend the legs to your desired height and secure them using the locking mechanisms.
4. **Extend Drying Rods:** At the top of the central column, gently pull out the individual drying rods. You can extend all rods for full capacity or only a few as needed.
5. **Secure Hanger Grooves:** For models with hanger grooves, ensure the included plastic wedges are inserted into the designated slots on the central column to align the rods diagonally, preventing hangers from sliding.

4. Operating Instructions

Using your JOOM Tripod Clothes Drying Rack is straightforward:

- **Unfolding:** To unfold, simply release the foot clip at the base and extend the tripod legs. Then, pull out the desired number of drying rods from the central column.
- **Hanging Clothes:** Distribute garments evenly across the drying rods to maintain stability. The rack can support up to 20 pounds (9 kg) of laundry. Utilize the hanger grooves for items that require hangers to prevent them from slipping.
- **Folding for Storage:** To fold, retract all drying rods back into the central column. Collapse the tripod legs and secure them with the foot clip. The rack will then be in its compact, upright position for easy storage.
- **Indoor and Outdoor Use:** This drying rack is suitable for both indoor and outdoor environments. When using outdoors, consider weather conditions and ensure the rack is placed on a flat, stable surface.

5. Maintenance

To ensure the longevity and optimal condition of your drying rack, follow these maintenance guidelines:

- **Cleaning:** Wipe down the rack with a damp cloth and mild detergent as needed. Avoid abrasive cleaners that

may damage the finish.

- **Drying:** Ensure the rack is completely dry before folding and storing, especially after outdoor use, to prevent moisture buildup.
- **Storage:** Store the folded rack in a dry place away from direct sunlight or extreme temperatures.
- **Rust Resistance:** The rack is designed to be rust-resistant. However, prolonged exposure to harsh weather conditions may affect its appearance over time.

6. Troubleshooting

If you encounter any issues with your drying rack, refer to the following common problems and solutions:

- **Instability:** If the rack appears unstable, ensure all three tripod legs are fully extended and locked into place on a flat, even surface. Distribute the weight of your laundry evenly across the rods.
- **Rods Not Extending/Retracting Smoothly:** Check for any obstructions or debris in the rod mechanism. Ensure the central column is clean. Do not force the rods; apply gentle, even pressure.
- **Hangers Sliding:** If hangers are sliding, ensure the plastic wedges are correctly inserted to create the diagonal alignment in the hanger grooves.
