6. MAINTENANCE

- **General Cleaning:** Wipe wooden surfaces with a damp cloth. Avoid excessive moisture.
- **Plush Areas:** The plush cushions and hammock can be spot cleaned with a mild pet-safe detergent. For deeper cleaning, the product care instructions specify "Hand Wash Only" for fabric components. Allow to air dry completely.
- **Sisal Posts:** Use a vacuum cleaner with a brush attachment to remove loose fibers and cat hair from the sisal posts.
- **Litter Box Enclosure:** Regularly clean the interior of the litter box enclosure. The louvered doors provide ventilation, but consistent cleaning is essential for hygiene.
- **Hardware:** Periodically check and tighten all screws and bolts to maintain the stability of the structure.

7. TROUBLESHOOTING

- **Wobbling/Instability:** Ensure the cat tree is placed on a level surface. Check all connections and tighten any loose screws or bolts. If the issue persists, verify that all parts were assembled correctly according to the manual.
- **Cat Not Using the Tree:** Cats may need time to adjust to new furniture. Try placing familiar toys or treats on different levels. Use catnip to attract your cat. Ensure the litter box inside the enclosure is clean and accessible.
- **Damaged Sisal Posts:** Sisal is a natural fiber and will fray with use. This is normal. If a post becomes severely damaged, contact customer support for potential replacement parts.
- **Teaser Sticks Detaching:** Ensure the teaser sticks are fully inserted into their designated slots. If they frequently detach during play, consider supervising play or removing them when not actively engaging your cat.
