Cuticle oil pen*1

Steel pusher*1

Cuticle fork*1

Figure 1: Overview of the JODSONE Gel Nail Polish Kit contents.

Key Features:

- **High Shine and Durability:** Gel nail polish offers vibrant colors and high shades. A thin layer can effectively display the color. When cured under the nail lamp, it can last for approximately 21 days without significant color fading.
- **Health Ingredients:** The gel nail polish is formulated with natural resin, healthy substances, and a professional formula. Its silky texture allows for easy application, and the soft brush ensures smooth coverage.
- **Smart Nail Lamp:** The included nail lamp features 3 curing modes (5s, 30s, 60s) and 30 LED light beads for comprehensive curing. It also includes a smart sensor that automatically turns the light on when hands are inserted and off when removed.

Figure 2: JODSONE Gel Polish features: Non-toxic, Low odor, Natural resin, Easy to apply.

2. SETUP

Before beginning your manicure, ensure you have a clean, well-lit workspace. Unpack all components and familiarize yourself with the tools.

2.1 Nail Lamp Setup:

1. Remove the UV LED nail lamp from its packaging.
2. Connect the power adapter to the lamp and plug it into a suitable electrical outlet.
3. The lamp is ready for use. It features an auto-sensor, so it will activate when your hand is placed inside. You can also manually select curing times (5s, 30s, 60s) using the buttons on top.

After applying the base coat, color gel nail polish and top coat, it is necessary to use a nail lamp for curing, which can make the nail art effect more durable.

3. OPERATING INSTRUCTIONS: GEL MANICURE APPLICATION

Follow these steps for a professional-looking gel manicure:

3.1 Nail Preparation:

1. **Trim, File, and Buff:** Use the nail clippers to trim your nails to the desired length. Shape your nails with the nail file. Gently buff the nail surface with the buff sponge to remove shine and create a slightly rough surface for better adhesion.
2. **Clean Nails:** Push back cuticles with the cuticle pusher and remove any excess with the cuticle fork. Cleanse your nails thoroughly with a nail removal wipe to ensure they are dry and oil-free.

3.2 Gel Polish Application:

3. **Apply Base Coat:** Apply a thin, even layer of JODSONE Base Coat to all nails. Avoid getting polish on your skin or cuticles.
4. **Cure Base Coat:** Place your hand under the UV LED nail lamp and cure for 45-60 seconds. The base coat will remain slightly sticky after curing; this is normal and helps the color gel adhere. Do not wipe it.
5. **Apply Color Gel:** Apply a thin, even layer of your chosen JODSONE Color Gel. For optimal color intensity, apply 2-3 thin coats, curing each coat separately.
6. **Cure Color Gel:** Place your hand under the UV LED nail lamp and cure each layer of color gel for 45-60 seconds.
7. **Apply Top Coat:** Apply a thin, even layer of JODSONE Glossy Top Coat or Matte Top Coat. Ensure you cap the free edge of the nail to prevent chipping.
8. **Cure Top Coat:** Place your hand under the UV LED nail lamp and cure for 60 seconds.
9. **Final Cleanse:** After the final top coat cure, wipe the nails with a nail removal wipe to remove any sticky residue and reveal the high shine (or matte finish).

Easy to Apply

Figure 5: Visual guide for gel nail polish application steps.

3.3 Helpful Tips:

- Apply thin coats of polish. Thick coats may not cure properly and can lead to peeling.
- Ensure each layer is fully cured before applying the next.
- Avoid touching your nails or cuticles with the brush during application to prevent lifting.
- Store gel polishes in a cool, dark place away from direct sunlight and the UV/LED lamp.

Video 2: A user shares their experience and tips for using the JODSONE gel polish kit, highlighting it as their go-to choice.

4. MAINTENANCE

4.1 Nail Lamp Care:

- Always unplug the lamp when not in use.
- Clean the lamp's interior and exterior with a soft, dry cloth. Avoid abrasive cleaners or solvents.
- Do not expose the lamp to excessive moisture.

4.2 Gel Polish Storage:

- Keep gel polish bottles tightly sealed to prevent air exposure and drying.
- Store bottles upright in a cool, dark place, away from direct sunlight or the UV/LED lamp, as light can cure the polish inside the bottle.

4.3 Tool Cleaning:

- Clean manicure tools after each use.
- Wipe down metal tools with alcohol. Replace disposable items like nail files and buff sponges regularly.

5. TROUBLESHOOTING

Here are solutions to common issues you might encounter:

Problem	Possible Cause	Solution
Gel polish not curing/still sticky after top coat	Too thick coats, insufficient curing time, old lamp bulbs, sticky layer not wiped.	Apply thinner coats. Increase curing time (e.g., 60s per coat). Ensure lamp is functioning correctly. Wipe sticky layer with nail removal wipe after final top coat.
Gel polish peeling/chipping quickly	Improper nail prep, polish on cuticles/skin, not capping free edge, incompatible products.	Ensure thorough nail prep (buffing, cleaning). Keep polish off skin. Always cap the free edge. Use JODSONE base/top coats with JODSONE color gels.
Bubbles in polish	Shaking bottle vigorously, applying too thick, old polish.	Roll bottle between palms instead of shaking. Apply thin coats. Ensure polish is not expired.
Nail lamp not turning on	Power issue, faulty adapter, sensor obstruction.	Check power connection and outlet. Ensure adapter is securely plugged in. Clear any obstructions from the sensor area.

Video 3: A short preview video from a seller, Amanda Vigil, offering insights before purchasing the kit. Useful for understanding potential considerations.

6. SAFETY INFORMATION

- **UV/LED Lamp Safety:** Avoid direct eye exposure to the UV/LED light. Use the lamp as directed and do not exceed recommended curing times.
- **Product Safety:** Gel polishes are for external use only. Avoid contact with eyes, mouth, and skin (other than the nail plate). In case of contact, rinse thoroughly with water and seek medical attention if irritation persists.
- **Ventilation:** Use products in a well-ventilated area to minimize inhalation of fumes.
- **Allergies:** If you experience any allergic reaction (redness, itching, swelling), discontinue use immediately and consult a medical professional.
- **Keep Out of Reach:** Keep all products and tools out of reach of children and pets.

7. PRODUCT SPECIFICATIONS

Feature	Specification
Product Dimensions	8.46 x 6.69 x 6.1 inches
Item Weight	2.2 Pounds (1 Kilogram)

Feature	Specification
Model Number	55-SUN1G-KIT
Brand Name	JODSONE
Nail Polish Type	Gel
Liquid Volume (per bottle)	5 Milliliters
Number of Items	60 (including polishes and tools)
Finish Types	Glossy, Matte
Additional Features	Long Wearing
