JT Eaton 969

JT Eaton Jawz Safe-Tee Rat and Mouse Bait Station Model 969 Instruction Manual

PRODUCT OVERVIEW

The JT Eaton Jawz Safe-Tee Rat and Mouse Bait Station, Model 969, provides a secure and reusable solution for rodent control. This tamper-resistant station is designed to protect bait from children and non-target animals when properly anchored. It features large, dual entrances suitable for rats and includes bait holder rods and a key for secure operation.

Safety Information

- Always read and follow all instructions and warnings on the rodenticide bait packaging before use.
- Wear protective gloves when handling bait.
- Place bait stations in areas inaccessible to children, pets, and non-target wildlife.
- Anchor the bait station securely to prevent it from being moved or opened by unauthorized individuals or animals.
- Dispose of dead rodents and leftover bait according to local regulations.
- Store the bait station key in a secure location away from children.

Package Contents

- 1 x JT Eaton Jawz Safe-Tee Rat and Mouse Bait Station
- 4 x Bait Holder Rods
- 1 x Safe-Tee Key

SETUP INSTRUCTIONS

1. **Unlock the Station:** Insert the provided Safe-Tee key into the lock mechanism on the side of the bait station. Turn the key to unlock and lift the lid.

Image: The bait station lid is open, revealing the interior and the key positioned next to it.

2. **Insert Bait:** Place rodenticide bait blocks onto the internal bait holder rods. Ensure the bait is securely fastened and cannot be easily removed by rodents. The station is designed to hold multiple bait blocks.

Image: Bait blocks are shown secured onto the rods inside the open bait station.

3. **Close and Secure:** Close the lid of the bait station firmly until it clicks into place. Ensure the station is fully locked to maintain its tamper-resistant properties.
4. **Anchor the Station:** For maximum security and to prevent relocation by rodents or other animals, anchor the bait station. Use wire, screws, or adhesive to secure it to a fixed surface or the ground.

OPERATING INSTRUCTIONS

1. **Placement:** Position the bait station in areas where rodent activity has been observed, such as along walls, in corners, or near entry points. The dual entrances allow rodents to enter from either side.
2. **Monitoring:** Regularly inspect the bait station to check for bait consumption. The frequency of inspection depends on the level of rodent infestation.
3. **Refilling Bait:** When bait has been consumed, unlock the station with the key and replenish the bait blocks as needed. Always wear protective gloves during this process.
4. **Continued Use:** The bait station is reusable. Continue to monitor and refill bait until signs of rodent activity cease.

MAINTENANCE

- **Cleaning:** Periodically clean the bait station to remove debris, dirt, or old bait. Use warm, soapy water and rinse thoroughly. Allow to dry completely before refilling with new bait.

- **Inspection for Damage:** Inspect the station for any signs of damage, such as cracks or chew marks, that could compromise its tamper-resistant features. Replace damaged stations immediately.
- **Storage:** When not in use, clean the bait station and store it in a cool, dry place away from children and pets.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Rodents are not entering the station.	Incorrect placement. Alternative food sources available. Bait type is not attractive.	Relocate the station to areas of high rodent activity (e.g., along walls, near droppings). Eliminate competing food sources. Try a different type or flavor of bait.
Bait is not being consumed.	Low rodent population. Bait is old or stale. Rodents are wary of new objects.	Confirm rodent presence. Replace bait with fresh product. Allow time for rodents to become accustomed to the station.
Station appears damaged or compromised.	Heavy rodent gnawing. External forces (e.g., weather, large animals).	Replace the bait station to maintain tamper-resistance. Ensure proper anchoring.

SPECIFICATIONS

Model Number	969
Brand	JT Eaton
Product Dimensions	10"L x 8"W x 12"H
Item Weight	14.1 ounces
Number of Pieces	1 (Bait Station, rods, and key)
Target Species	Rat, Mouse
Power Source	Manual
UPC	076706969002
ASIN	B0BKH6DWPN
