Operating Features

Ooze Play

The playset includes 2.4 oz of green slimy ooze. This can be dropped from the Ooze Tube located at the top of the playset, or placed inside the Ooze Ball and rolled down the tracks to surprise villains.

Maintenance

To ensure the longevity of your playset, regularly wipe down surfaces with a damp cloth. For the Ooze Tube, it can be detached and cleaned with warm water to remove any residue. Ensure all parts are dry before reassembly.

Troubleshooting

Loose Connections

If modular parts or accessories become loose, ensure they are properly aligned and firmly clicked into place. Some parts, especially the cardboard backdrop, may require occasional re-securing.

Sticker Peeling

Over time, some stickers may begin to peel. This is normal wear and tear. You may re-adhere them with a small amount of non-toxic adhesive if desired.

Ooze Clogging

If the Ooze Tube becomes clogged, detach it and clean thoroughly with warm water. Ensure the ooze is not left to dry inside the tube.
