Philips SFL1000H/10

Philips SFL1000H/10 130 Lumens Headlamp Instruction Manual

Model: SFL1000H/10 | Brand: Philips

INTRODUCTION

Thank you for choosing the Philips SFL1000H/10 Headlamp. This manual provides essential information for the safe and effective use of your new headlamp. Please read it thoroughly before operation and keep it for future reference.

Image: Philips SFL1000H/10 Headlamp, a compact head-mounted light with a green strap and three LED lights on the front.

Key Features

- **Powerful Illumination:** Provides 130 lumens of brightness for clear visibility in your surroundings.
- **Three Lighting Modes:** Features strong, weak, and red flashing modes to adapt to various lighting needs.

- **Versatile Use:** Ideal for camping, hiking, cycling, other outdoor activities, and indoor work.
- **Water Resistance:** IPX4 rated for protection against splashing water from any direction.
- **Adjustable Light Power:** Allows you to regulate the light intensity.
- **Light Alarm:** Includes a light alarm function for added safety or signaling.

Setup: Battery Installation

Your Philips SFL1000H/10 Headlamp requires AAA batteries, which are included with the product. To install or replace the batteries:

1. Locate the battery compartment on the back of the headlamp unit.
2. Open the battery compartment cover.
3. Insert the AAA batteries, ensuring correct polarity (+ and -) as indicated inside the compartment.
4. Close the battery compartment cover securely until it clicks into place.

Note: Always use fresh batteries of the same type and brand for optimal performance. Remove batteries if the headlamp will not be used for an extended period.

Operating Instructions

The Philips SFL1000H/10 Headlamp is designed for ease of use with its intuitive controls.

Power On/Off and Mode Selection

1. To turn the headlamp **ON**, press the power button located on the top of the unit.
2. Each subsequent press of the power button will cycle through the available lighting modes:
   - **Strong Light Mode:** Provides maximum brightness (130 lumens).
   - **Weak Light Mode:** Offers reduced brightness for extended battery life or less intense lighting needs.
   - **Red Flashing Mode:** Ideal for signaling or maintaining night vision without disturbing others.
3. To turn the headlamp **OFF**, continue pressing the power button until the light switches off, or press and hold the power button for a few seconds in any mode.

Adjustable Light Power and Light Alarm

The headlamp features adjustable light power and a light alarm. Specific instructions for these functions are typically detailed in the full product manual. Generally, power adjustment involves holding the power button while the light is on to dim or brighten, and the light alarm may be activated by a dedicated button or a specific sequence of power button presses.

MAINTENANCE

- **Cleaning:** Wipe the headlamp with a soft, damp cloth. Do not use abrasive cleaners or solvents.

- **Storage:** Store the headlamp in a cool, dry place when not in use. Remove batteries if storing for extended periods to prevent leakage.

- **Water Resistance:** While IPX4 rated, avoid submerging the headlamp in water. Ensure the battery compartment is securely closed before exposure to moisture.

SPECIFICATIONS

Feature	Detail
