If you encounter any issues with your storage box, refer to the following common solutions.

- **Wobbly or Uneven:** Check if all adjustable feet are properly installed and adjusted. Rotate the feet to level the box on uneven floors. Ensure all frame screws are tightened.
- **Lid Not Closing Properly:** Verify that the hinge mechanism is correctly aligned and secured. Check for any obstructions in the storage compartment that might prevent the lid from closing fully.
- **Squeaking Noises:** Apply a small amount of silicone lubricant to the hinge points if they produce noise during operation.
- **Scratches on Surfaces:** Minor scratches on wood panels can sometimes be minimized with furniture polish or repair kits. For faux leather, avoid sharp objects.
