Setup

Upon receiving your Pokémon Solgaleo GX SM16 card, consider the following steps to ensure its preservation and readiness for use:

1. **Inspection:** Carefully examine the card for any manufacturing defects or shipping damage. Note any imperfections immediately.
2. **Sleeving:** To protect the card from scratches, dust, and wear, it is highly recommended to place it in a protective card sleeve. Use sleeves designed for standard trading card sizes.
3. **Toploader/Binder Storage:** For enhanced protection, place the sleeved card into a rigid toploader or a dedicated trading card binder with acid-free pages. This prevents bending and creasing.
4. **Environment:** Store the card in a cool, dry place away from direct sunlight, extreme temperatures, and humidity to prevent warping, fading, or other environmental damage.

Operating (Gameplay)

- **Card Type:** This is a Basic Pokémon GX card. It can be played directly onto your Bench.
- **Abilities:** The card features the "Full Metal Wall" Ability, which prevents all damage done to this Pokémon by attacks from your opponent's Pokémon-GX and Pokémon-EX.
- **Attacks:**
  - **Sunsteel Strike:** Requires specific Energy types to use. Deals significant damage but may have a drawback (e.g., discarding Energy).
  - **Sol Burst GX:** A powerful GX attack that can only be used once per game. This attack allows you to search your deck for 5 Energy cards and attach them to your Pokémon in any way you like.
- **Weakness/Resistance/Retreat Cost:** These values affect how the card interacts with other Pokémon in battle. Refer to the card's text for specific details.
- **Strategic Use:** Solgaleo GX is typically used as a strong attacker and energy accelerator due to its GX attack. Its ability provides defense against other powerful GX/EX Pokémon.

- **Cleaning:** If necessary, gently wipe the card with a clean, dry, lint-free microfiber cloth. Avoid using any liquids or abrasive materials.
- **Storage Conditions:** Continue to store the card in its protective sleeve and toploader/binder in a stable environment. Avoid attics, basements, or areas prone to temperature fluctuations or moisture.

Troubleshooting

While trading cards are generally simple items, certain issues may arise.

Issue	Possible Cause	Solution
Card is bent or warped	Improper storage, exposure to humidity or temperature changes.	Store flat under light pressure in a dry environment. For severe warping, professional restoration may be considered, though it can affect value.
Card surface is scratched	Lack of protective sleeves, rough handling.	Always use protective sleeves and handle with care. Scratches are generally permanent.
Fading colors	Exposure to direct sunlight or strong artificial light.	Store cards away from light sources. Fading is irreversible.
Unsure of card authenticity	Purchased from an unofficial source, unfamiliar with card details.	Compare with official images and known authentic cards. Consult a reputable card grading service or experienced collector.
