

HTN96

Generic HTN96 Artificial Golden Foliage Plant Instruction Manual

INTRODUCTION

This manual provides instructions for the Generic HTN96 Artificial Golden Foliage Plant. This product is designed for decorative purposes, offering a touch of elegance to various environments without the need for maintenance associated with live plants. Please read these instructions carefully to ensure proper handling and display.

SETUP AND UNPACKING

Your artificial golden foliage plant is crafted from durable plastic. Due to the custom handmade nature of each product, slight variations in size may occur. For packaging and shipping efficiency, the branches of your plant may be bent. This is normal and will not affect the product's appearance or integrity.

1. Carefully remove the plant from its packaging.
2. Gently straighten any bent branches to achieve your desired arrangement. The plastic material allows for flexible shaping.
3. Place the foliage in a suitable vase or container (not included) to complete your decorative display.

USAGE AND ARRANGEMENT

The HTN96 artificial golden foliage is versatile and suitable for various decorative applications. It is ideal for enhancing home living rooms, desks, offices, and for special occasions such as weddings and Christmas holidays.

- Use individual branches to complement existing floral arrangements.
- Combine multiple branches to create a fuller, more impactful display.
- Integrate with other decorative elements to match your interior design theme.

Image: A single golden artificial fern leaf branch, suitable for adding texture to arrangements.

Image: A single golden artificial branch featuring heart-shaped leaves, offering a unique design element.

MAINTENANCE

The HTN96 artificial foliage requires minimal maintenance to retain its appearance.

- **Cleaning:** To remove dust, gently wipe the leaves with a soft, dry cloth. For more stubborn dirt, a slightly damp cloth can be used, followed by drying.
- **Storage:** If storing the plant, ensure it is kept in a dry, cool place away from direct sunlight to prevent color fading over extended periods.
- **Avoid:** Do not use harsh chemicals or abrasive cleaners, as these may damage the plastic material or finish.

TROUBLESHOOTING

Most issues with artificial plants are related to initial setup or minor adjustments.

- **Bent Branches:** If branches appear bent upon arrival, gently reshape them by hand. The plastic material is designed to be flexible.
- **Dust Accumulation:** Refer to the 'Maintenance' section for cleaning instructions.
- **Fading Color:** While designed for durability, prolonged exposure to direct, intense sunlight may cause slight fading over many years. Position the plant in an area with indirect light if this is a concern.
