## SETUP GUIDE

## Connecting Your Steam Deck

1. Place your Steam Deck securely into the docking station's integrated stand.
2. Connect the built-in USB-C cable from the docking station to the USB-C port on your Steam Deck.

This image illustrates how to connect the integrated USB-C cable from the docking station to the Steam Deck's USB-C port, ensuring a secure fit for power and data transfer.

## Power Connection

Connect your original Steam Deck power adapter (or a compatible 100W USB-C PD charger) to the USB-C PD port on the docking station. This will power the dock and charge your Steam Deck.

## WIDELY COMPATIBILITY

## OPERATING INSTRUCTIONS

### Display Switching

Once connected, your Steam Deck should automatically output video to the connected display. If not, you may need to adjust display settings on your Steam Deck.

Some docking stations feature a button to switch between the Steam Deck's screen and the external display. Refer

to the specific button on your dock if available.

Your browser does not support the video tag.

This video demonstrates the process of docking the Steam Deck and connecting it to an external monitor, showcasing how the display automatically switches and the use of external peripherals like a keyboard and mouse. It also briefly shows compatibility with Nintendo Switch.

### Charging Functionality

The docking station supports Power Delivery (PD) up to 100W, allowing your Steam Deck to charge at its maximum 45W speed while docked and in use.

## MAINTENANCE

- Keep the docking station clean by wiping it with a soft, dry cloth.
- Avoid exposing the device to extreme temperatures, humidity, or direct sunlight.
- Do not attempt to disassemble or repair the docking station yourself. Contact customer support for assistance.

## TROUBLESHOOTING

### No Display Output

- Ensure all cables (USB-C to Steam Deck, HDMI to display) are securely connected.
- Verify that your TV/monitor is set to the correct HDMI input source.
- Check the power connection to the docking station.
- Restart your Steam Deck.

### Peripherals Not Working

- Ensure USB devices are properly inserted into the correct ports.
- Try connecting the peripheral directly to the Steam Deck (if possible) to rule out device issues.
- Restart the Steam Deck and reconnect the peripheral.

### Slow Charging

- Ensure you are using a power adapter that supports USB-C Power Delivery (PD) and provides sufficient wattage (e.g., 45W or higher for Steam Deck).
- Check if the power cable is securely connected to both the adapter and the docking station.
