## 2. SETUP

Before using your JSAUX Sling Bag, ensure it is properly prepared for your devices and accessories.

- 1. Unpack the Bag:** Remove the sling bag from its packaging. Inspect for any signs of damage.
- 2. Adjust the Shoulder Strap:** The bag features an adjustable shoulder strap. Lengthen or shorten the strap using the

buckle to achieve a comfortable fit for your body type and preferred carrying style (e.g., crossbody, over one shoulder).

3. **Open Main Compartment:** Unzip the main compartment fully. Note the internal resistance bands designed to prevent the bag from opening completely flat, which helps secure contents when accessing the bag while worn.
4. **Insert Main Device:** Carefully slide your primary gaming device (Steam Deck, ROG Ally, Switch, PS5 Portal) into the dedicated independent cabin. Ensure it fits snugly to maximize protection.
5. **Organize Accessories:** Utilize the multiple internal pockets and separated rooms to organize your accessories. Place larger items like docking stations or power banks in the main accessory area, and smaller items like cables, earbuds, or cell phones in the designated pockets.

## 3. OPERATING THE SLING BAG

The JSAUX Sling Bag is designed for ease of use and secure transport.

- **Wearing the Bag:** Wear the bag across your body or over one shoulder. For active use (e.g., cycling, running), ensure the anti-sloshing belt is secured to keep the bag close to your body and prevent excessive movement.

- **Accessing Contents:** When accessing items, partially unzip the main compartment. The internal resistance bands will prevent the bag from fully opening, keeping your device and accessories secure inside while you retrieve what you need.
- **Securing Zippers:** Always ensure all zippers are fully closed before moving to prevent items from falling out. The rust-proof hardware zippers are designed for smooth operation and durability.

## 4. MAINTENANCE

Proper care will extend the life and maintain the appearance of your JSAux Sling Bag.

- **Cleaning the Exterior:** For general cleaning, wipe the oxford fabric and EVA hard shell surfaces with a damp cloth. For stubborn stains, use a mild soap solution and rinse thoroughly with a clean, damp cloth. Allow to air dry completely.
- **Cleaning the Interior:** Use a soft, dry cloth or a lint roller to remove dust and debris from the interior compartments. For spills, spot clean with a damp cloth and mild soap, then air dry.
- **Zipper Care:** Periodically check the zippers for any debris or stickiness. If a zipper becomes stiff, apply a small amount of zipper lubricant or graphite (from a pencil) to the teeth and move the zipper pull back and forth to distribute.
- **Storage:** Store the bag in a cool, dry place away from direct sunlight when not in use. Avoid placing heavy objects on top of the bag to maintain its shape and the integrity of the EVA hard shell.

- **Device Does Not Fit Snugly:**

- Ensure your device is correctly oriented within the dedicated cabin.
- Verify that your device model is listed as compatible.

- **Zippers are Stiff or Stuck:**

- **Bag Feels Uncomfortable or Shifts During Movement:**

- Adjust the shoulder strap length to ensure the bag sits comfortably and securely against your back or chest.
- Ensure the anti-sloshing belt is properly fastened and tightened to minimize bag movement.
