## 8. TROUBLESHOOTING

If you encounter issues, try these common solutions:

| Problem                       | Solution  |
|-------------------------------|---|
| Laptop does not power on      | Ensure the power adapter is securely connected and the outlet is working. Try charging for at least 30 minutes before attempting to power on again.   |
| No Wi-Fi connection           | Check if Wi-Fi is enabled in Windows settings. Restart your router and the laptop. Ensure you are within range of a Wi-Fi signal.   |
| Slow performance              | Close unnecessary applications. Check for and install Windows updates. Run a disk cleanup. Consider upgrading RAM or SSD if performance issues persist.                                       |
| External display not detected | Ensure the HDMI cable is securely connected to both the laptop and the display. Check the input source on your external display. Press <b>Windows key + P</b> to cycle through display modes. |
