INJOPEXI 86"Lx40"Wx39"H

INJOPEXI Metal Chicken Coop User Manual

Model: 86"Lx40"Wx39"H

Brand: INJOPEXI

INTRODUCTION

This manual provides essential information for the safe and effective assembly, operation, and maintenance of your INJOPEXI Metal Chicken Coop. Designed as a versatile enclosure, it offers a secure and spacious environment for various small animals, including chickens, ducks, geese, rabbits, cats, and puppies. Please read these instructions thoroughly before beginning assembly or use to ensure proper setup and longevity of the product.

Figure 1: The INJOPEXI Metal Chicken Coop, showcasing its spacious design and secure locking mechanism. This image displays the fully assembled INJOPEXI Metal Chicken Coop, featuring its spacious design and integrated blue waterproof cover. Several chickens and ducks are visible inside the enclosure, demonstrating its capacity for various poultry. A close-up inset shows a hand operating the secure hook lock mechanism on one of the doors.

SAFETY INSTRUCTIONS

Adherence to these safety guidelines is crucial for the well-being of your animals and the durability of the coop.

- **Secure Placement:** Always install the coop on a level, stable surface. Utilize the provided ground nails to firmly anchor the structure, preventing accidental tipping or displacement by strong winds or animals.
- **Predator Protection:** While the coop offers significant security, regularly inspect the structure and ground anchors to ensure no gaps or weaknesses could allow predator entry. Consider additional measures like an apron of hardware cloth if local predator threats are high.
- **Animal Supervision:** Periodically check on animals housed within the coop to ensure their safety and comfort.
- **Structural Integrity:** Do not place excessive weight on the coop's roof or sides, as this may compromise its structural integrity.
- **Child Safety:** Keep children away from the assembly area. Ensure all doors are securely latched when animals are inside.

PACKAGE CONTENTS

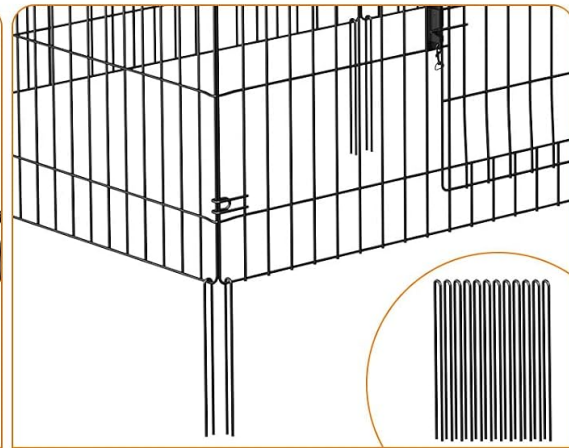

Before assembly, verify that all components listed below are present and undamaged.

- Metal Wire Panels (various sizes for walls, roof, and doors)
- UV Protection & Waterproof Cover (blue tarp)
- Zip Ties (approximately 30 pieces)
- U-shaped Ground Nails (approximately 20 pieces)
- Hook Buckle Door Locks (pre-attached or separate)
- Support Rods (for roof structure)
- Assembly Instruction Manual (this document)

Support rod

Figure 2: Key components for the coop's solid structure. This image details the components contributing to the coop's solid structure. It displays bundles of zip ties (x30), U-shaped ground nails (x20), a close-up of the hook door locks, and support rods, all essential for stable assembly and secure operation.

SETUP AND ASSEMBLY

The INJOPEXI Metal Chicken Coop is designed for quick and tool-free assembly, typically taking less than 20 minutes.

1. **Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, flat surface. Verify all components are present as per the 'Package Contents' section.
2. **Connect Panels:** Begin by connecting the wire mesh panels to form the base and side walls of the enclosure. Use the provided zip ties to secure the panels together at all connecting points. Ensure a snug and stable connection.
3. **Install Roof Structure:** Attach the roof panels and support rods. The roof sections are designed to interlock or connect with zip ties, forming a sturdy overhead structure.
4. **Attach Doors:** The coop features three side doors and one top door. Ensure all doors are correctly aligned and their pre-attached hook buckle locks function smoothly.
5. **Secure to Ground:** Once the main structure is assembled, position the coop in its desired location. Use the 20 U-shaped ground nails to firmly anchor the coop to the ground, pushing them deep into the soil for maximum stability.

6. **Install Cover:** Drape the UV protection and waterproof cover over the designated roof section. Secure it in place using any integrated fasteners or additional zip ties to prevent it from being dislodged by wind.

Figure 3: Example of a secure connection point during assembly. This image shows a close-up of how the wire mesh panels connect, highlighting the ease of installation and secure fastening points.

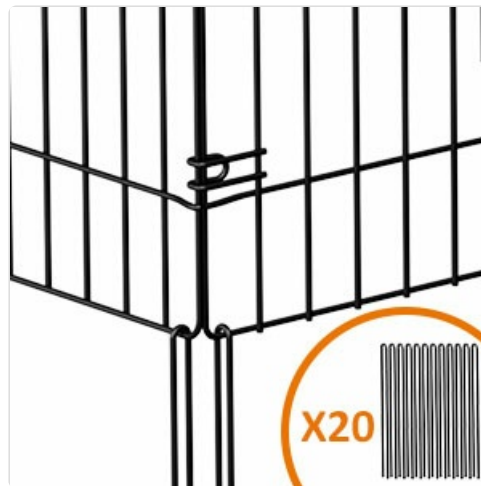

Figure 4: U-shaped ground nails for anchoring the coop. This image displays a bundle of 20 U-shaped ground nails, which are used to firmly secure the chicken coop to the ground, enhancing its stability.

OPERATING INSTRUCTIONS

Using your INJOPEXI Metal Chicken Coop effectively involves understanding its access points and protective features.

- **Access Doors:** The coop is equipped with three side doors for easy entry and exit of your pets. These doors feature an automatic drop lock design and additional hook buckle locks for enhanced security, preventing animals from opening them.
- **Top Door for Convenience:** A dedicated door on the top of the coop allows for convenient feeding, watering, or accessing animals from above without needing to enter the main enclosure.
- **Weather Protection:** The included UV protection and waterproof cover should be installed to shield your animals from direct sunlight, rain, and snow. Ensure it is securely fastened to prevent water accumulation and provide optimal protection.
- **Capacity:** This large-sized chicken pen is designed to comfortably accommodate up to 8 chickens, or a comparable number of other small animals, providing ample space for movement.

More secure, 3 Doors Are Designed with Hook Locks
Animals Cannot Open Them

Automatic drop lock

Hook design, more secure

Figure 5: Secure door locks in detail. This image focuses on the security features of the coop's doors. It shows a close-up of the hook buckle door locks, emphasizing their design to prevent animals from opening them. The main illustration depicts the coop with three doors equipped with these secure locks.

1 Door On Top + 3 Doors Around, More Convenient

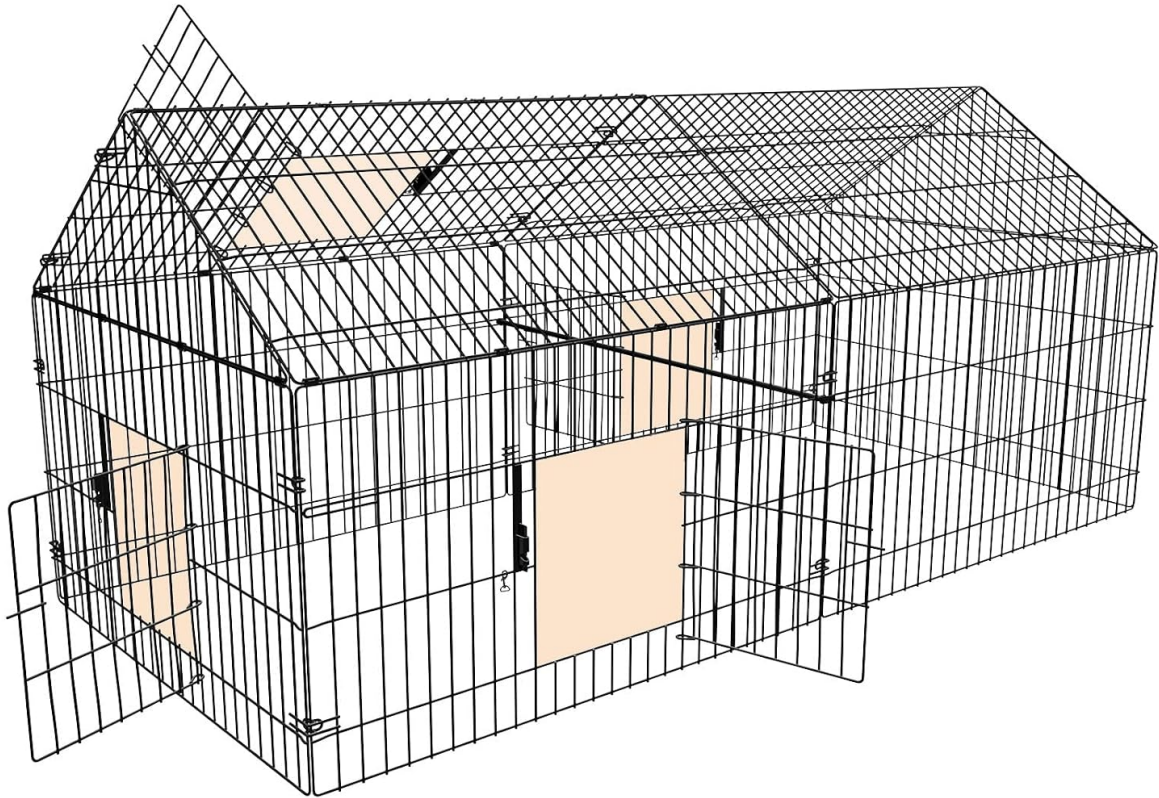

Figure 6: Multiple access doors for convenience. An illustration of the chicken coop highlighting its multiple access points. It shows three doors located around the sides for easy entry and exit of pets, and one door on the top for convenient feeding or access from above.

UV Protection & Waterproof Cover

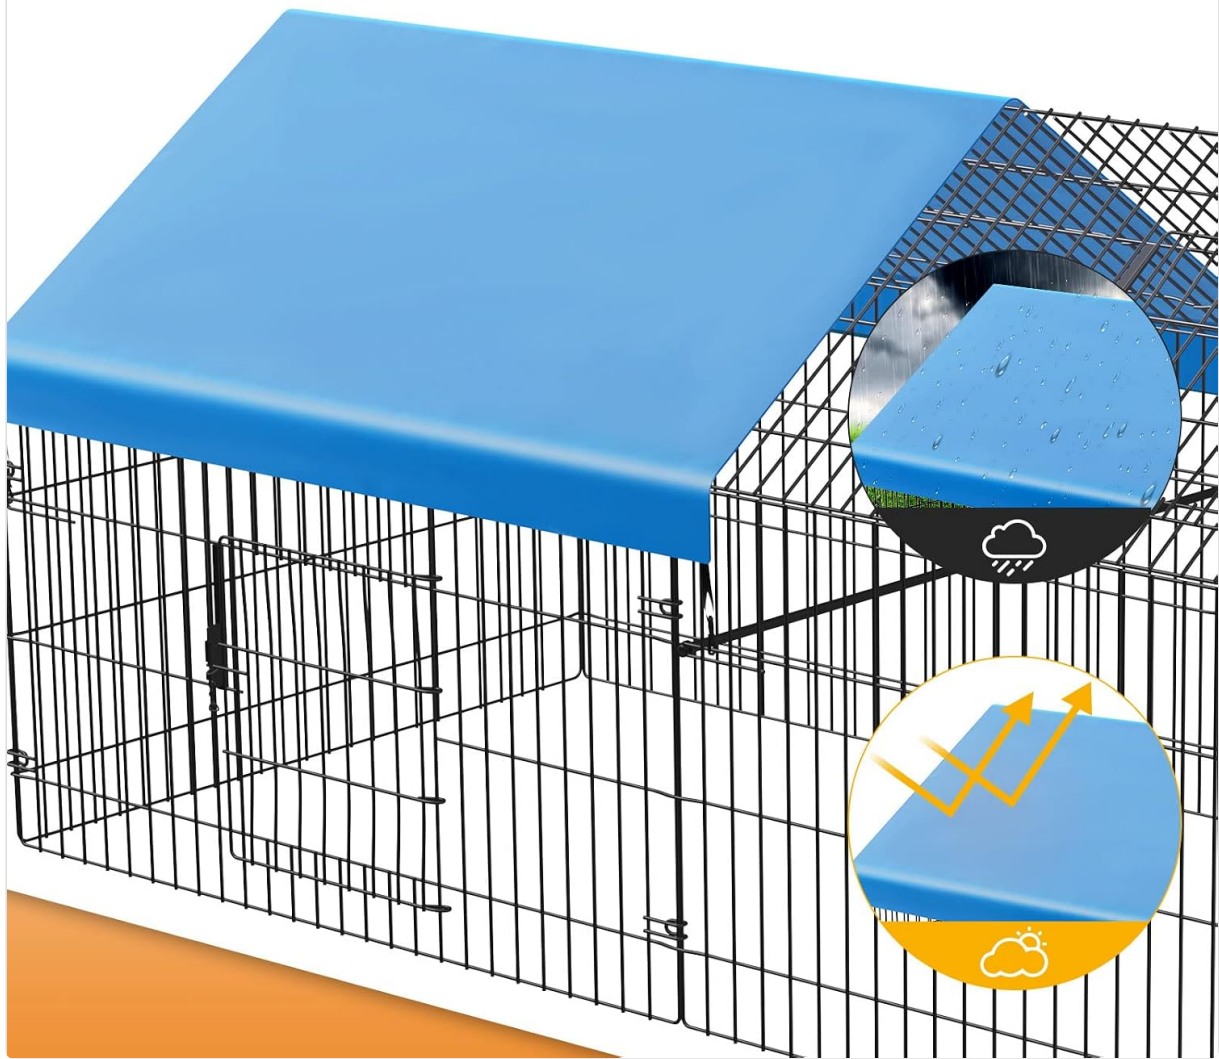

Figure 7: UV protection and waterproof cover. A close-up view of the blue cover installed on the chicken coop, illustrating its UV protection and waterproof capabilities. Icons indicate protection against sun and rain, highlighting how the cover prevents water accumulation and shields pets from the elements.

MAINTENANCE

Regular maintenance will extend the life of your chicken coop and ensure a safe environment for your animals.

- **Cleaning:** Periodically clean the coop to maintain hygiene. The metal construction can be wiped down with a damp cloth and mild, pet-safe detergent. Rinse thoroughly and allow to dry completely.
- **Inspect Structure:** Regularly check all wire panel connections, zip ties, and ground nails for any signs of loosening or damage. Tighten or replace as necessary to maintain structural integrity.
- **Lock Functionality:** Ensure all door locks (automatic drop locks and hook buckles) are functioning correctly. Lubricate moving parts if they become stiff.
- **Cover Care:** Inspect the waterproof cover for tears or damage. Clean it with water and a soft brush if it becomes dirty. Ensure it is securely attached to prevent flapping in windy conditions.
- **Rust Prevention:** The coop features a rustproof coating. However, if any scratches or exposed metal appear, touch up with a rust-inhibiting paint to prevent corrosion.

TROUBLESHOOTING

This section addresses common issues you might encounter with your chicken coop.

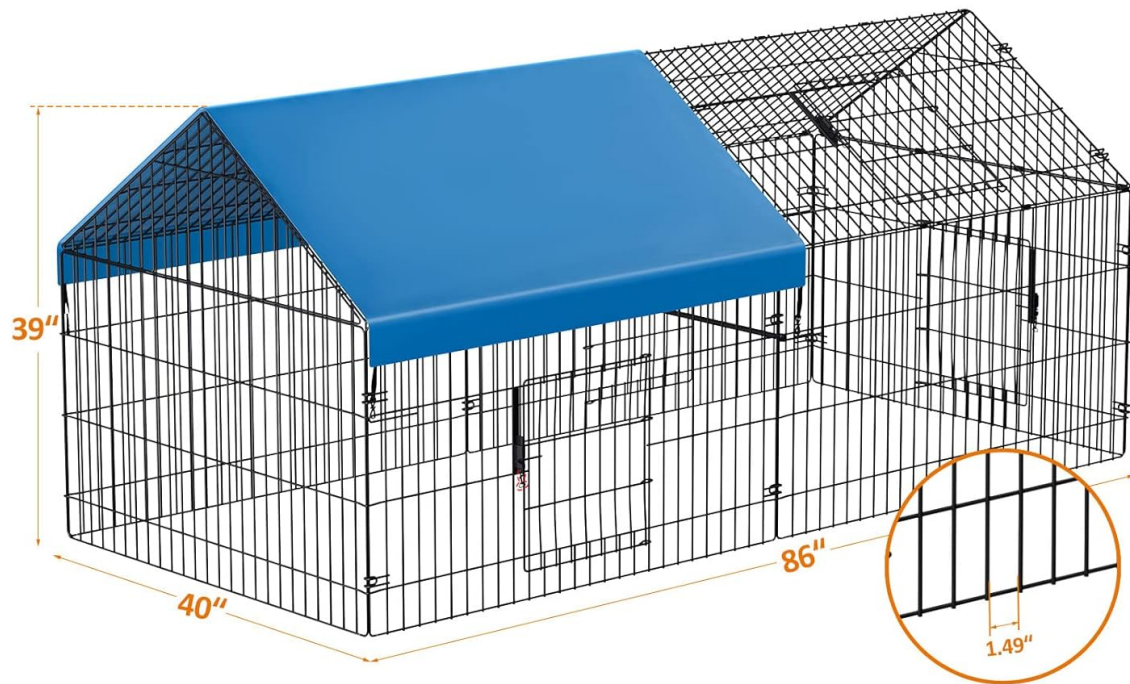

- Issue: Coop feels unstable or wobbly.**
Solution: Ensure all wire panels are securely connected with zip ties. Re-check that all 20 U-shaped ground nails are fully inserted into the ground. If the ground is soft, consider relocating to a firmer area or adding more anchors.
- Issue: Animals are escaping.**
Solution: Verify that all three side doors and the top door are fully closed and their automatic drop locks and hook buckles are engaged. Inspect the entire perimeter for any gaps or holes in the wire mesh that may have developed.
- Issue: Water accumulates on the cover or leaks into the coop.**
Solution: Ensure the waterproof cover is properly stretched and secured over the roof, allowing water to run off. Check for any tears or punctures in the cover and repair or replace if necessary.
- Issue: Door locks are stiff or difficult to operate.**
Solution: Clean any dirt or debris from the lock mechanisms. Apply a small amount of lubricant (e.g., silicone spray) to the moving parts of the locks.

If you encounter issues not covered here or require further assistance, please contact customer service.

SPECIFICATIONS

Feature	Detail
Product Dimensions (L x W x H)	86" x 40" x 39" (218.44 cm x 101.6 cm x 99.06 cm)
Item Weight	32.6 pounds (14.79 kg)
Material	Iron with rustproof coating
Color	Black
Special Features	Lockable doors, Top opening, Waterproof cover
Target Audience	Dogs, Small-animal-pets (Chickens, Ducks, Geese, Rabbits, Cats, Puppies)
