VRURC T1116

VRURC 10000mAh Portable Charger Power Bank User Manual

Model: T1116 | Brand: VRURC

INTRODUCTION

Thank you for choosing the VRURC 10000mAh Portable Charger Power Bank. This compact and versatile power bank is designed to keep your devices charged on the go, featuring multiple built-in cables and outputs for ultimate convenience. Please read this manual carefully to ensure safe and optimal use of your new device.

WHAT'S IN THE BOX

- 1x VRURC 10000mAh Power Bank
- 1x Travel Pouch
- 1x User Manual

PRODUCT FEATURES

Built-in 4 Cables

Equipped with built-in cables compatible with iPhone, Samsung, Android, and other smart devices. Includes a USB cable for recharging the power bank itself, eliminating the need for extra cords.

Power Bank Built-in 4 Cables

3 Charging Cable + 1 Recharging Cable (USB-A)

For iPhone

Intelligent LED Display

An intelligent LED display accurately shows the remaining power percentage, allowing you to manage your charging needs effectively.

Image: The power bank displaying "100" on its LED screen, indicating a full charge.

Safety Charging

Built with a high-quality smart chip to protect your devices against over-charge, over-voltage, over-current, and short circuits.

SETUP

Initial Power Bank Charge

Before first use, fully charge your VRURC Power Bank. Use the built-in USB-A cable or a USB-C cable with a compatible wall adapter (not included). The LED display will show the charging progress, reaching 100% when fully charged.

Two Ways for Recharge

6 hrs

12W Type-C Input Port
(Adapter not include)

6 hrs

**Built in USB-A
Cable for input**

Image: Demonstrates two methods of recharging the power bank: via its built-in USB-A cable and through the Type-C input port.

Identifying Built-in Cables

The power bank features four built-in cables: Lightning (for iPhone), Type-C, Micro USB, and a USB-A cable for recharging the power bank itself. These are neatly integrated into the device's design.

Charging External Devices

1. Identify the correct built-in cable for your device (Lightning, Type-C, or Micro USB).
2. Gently pull out the desired cable from its slot.
3. Connect the cable to your device's charging port.
4. The power bank will automatically begin charging. The LED display will show the remaining power.
5. For devices requiring USB-A or USB-C input, use the dedicated USB-A or USB-C output ports on the power bank.
6. To charge multiple devices, connect them to the available built-in cables and ports.

Charging Directly Anywhere

No need to carry any extra cables

Image: A user charging a smartphone directly using one of the power bank's built-in cables, emphasizing convenience.

Recharging the Power Bank

When the power bank's charge is low (indicated by the LED display), recharge it using one of the following methods:

- **Using Built-in USB-A Cable:** Pull out the built-in USB-A cable and plug it into a USB wall adapter or a computer's USB port.
- **Using USB-C Input Port:** Connect a USB-C cable (not included) to the power bank's USB-C input port and plug the other end into a compatible wall adapter.

A full recharge from 0% to 100% typically takes approximately 6 hours.

MAINTENANCE

- Keep the power bank away from extreme temperatures, direct sunlight, and liquids.
- Avoid dropping or subjecting the device to strong impacts.
- Clean the surface with a soft, dry cloth. Do not use harsh chemicals or abrasive materials.
- Store in a cool, dry place when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Power bank not charging device	Low power bank battery; Loose cable connection; Incompatible device.	Recharge power bank; Ensure cables are securely connected; Verify device compatibility.
Power bank not recharging	Faulty charging adapter/cable; Power bank malfunction.	Try a different adapter/cable; Contact customer service if issue persists.
LED display not working	Device malfunction.	Press the power button to activate; Contact customer service.
