CubiCubi Electric Standing Desk (Model CB-DJ) User Manual

Model: CB-DJ

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your CubiCubi Electric Standing Desk, Model CB-DJ. Please read this manual thoroughly before use to ensure proper function and safety.

SAFETY INFORMATION

For your safety, please observe the following:

- Do not exceed the maximum weight capacity of 176 lbs (80 kg). Overloading may cause instability and damage.
- Ensure all components are securely fastened during assembly.
- Keep hands and objects clear of moving parts during height adjustment.
- The desk features anti-collision technology. If an obstacle is detected during movement, the desk will stop and reverse slightly. Do not attempt to force movement against an obstacle.
- Only use the desk on a level surface.

SETUP AND ASSEMBLY

The CubiCubi Electric Standing Desk is designed for straightforward assembly. All necessary tools and detailed instructions are included. For a visual guide, please refer to the assembly video below.

MAINTENANCE

To ensure the longevity and optimal performance of your CubiCubi Electric Standing Desk, follow these maintenance guidelines:

- **Cleaning:** Wipe the desktop and frame with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish.
- **Inspection:** Periodically check all screws and bolts to ensure they are tight. Retighten if necessary.
- **Cable Management:** Ensure power cables and other cords are not tangled or obstructing the desk's movement.
- **Weight Distribution:** Distribute weight evenly across the desktop to prevent strain on the lift mechanism.

TROUBLESHOOTING

If you encounter issues with your electric standing desk, refer to the following common problems and solutions:

Desk Not Adjusting / E02 Error

- **Problem:** The desk does not move, or the control panel displays an 'E02' error code.
- **Solution:** This often indicates a need for a system reset or a motor connection issue.
 1. **Perform a Reset:** Press and hold the **DOWN (v)** button on the control panel for 5 seconds. The desk should move to its lowest position and then slightly back up, indicating a successful reset.
 2. **Check Motor Connections:** Ensure all cables connecting the motor to the control box and power supply are securely plugged in.
 3. **Motor Wing Adjustment (Advanced):** If the reset does not work, try loosening the screws of the motor wing slightly, move it around gently, then repeat the reset procedure (press and hold the UP and DOWN buttons simultaneously for 5 seconds).

Desk is Wobbly at Max Height

- **Problem:** The desk feels unstable or wobbly when raised to its maximum height.
- **Solution:**
 1. Ensure all assembly screws are tightened.
 2. Verify the desk is on a level surface. Adjust the leveling feet if necessary.
 3. Avoid placing excessively heavy items on one side of the desk.

If these steps do not resolve the issue, please contact customer support.
