## XTREME XCA2-1031-BLK

# Xtreme Gaming LED Wired Headset Instruction Manual

Model: XCA2-1031-BLK

## INTRODUCTION

---

The Xtreme Gaming Wired Headset with LED Color Lights is designed to provide a high-quality audio experience for PC gaming. Featuring vibrant LED color flow effects, a built-in microphone, and convenient volume controls, this headset ensures immersive gameplay and clear communication. Its wired design eliminates the need for charging, offering continuous power for extended gaming sessions.

## KEY FEATURES

- **Multicolor LED Lights:** Activate dynamic color flow effects by plugging the USB cable into your computer or controller.
- **Excellent Sound Quality:** Provides clear and powerful sound playback for an immersive gaming experience.
- **Wired Connectivity:** Ensures continuous power without the need for recharging or batteries, keeping you ready for online gaming.
- **USB Powered:** Simple plug-and-play functionality via USB for immediate use.
- **Built-in Microphone:** Integrated microphone for clear voice communication during gameplay.
- **Volume and Mic Controls:** Accessible controls for adjusting audio levels and microphone settings.

## **PACKAGE CONTENTS**

---

Please ensure all items are present before proceeding with setup.

- Xtreme Gaming LED Wired Headset

- Ear Cushions
- 3.5mm Audio Y-Splitter (for PC/Laptop)

Figure 3: Headset with included USB and 3.5mm Y-splitter cables.

## SETUP GUIDE

---

### 1. Connecting to a PC/Laptop

1. Locate the USB connector on the headset cable.
2. Insert the USB connector into an available USB port on your desktop PC or laptop. This connection powers the LED lights and enables plug-and-play functionality.

3. For audio and microphone functionality, connect the 3.5mm audio jack(s) to the corresponding audio input/output ports on your computer. If your computer has separate ports for microphone and headphones, use the included 3.5mm Y-splitter cable.
4. Ensure the headset is recognized by your operating system. You may need to select it as the default audio input/output device in your sound settings.

## 2. LED Lights Activation

The multicolor LED lights will automatically activate once the USB cable is successfully connected to a powered USB port. The lights feature a color flow effect, circling around the headset structure.

## OPERATING INSTRUCTIONS

---

### 1. Volume Control

Adjust the audio volume using the integrated volume control dial located on the headset cable or earcup (if applicable).

Rotate the dial up to increase volume and down to decrease it.

## **2. Microphone Usage**

The headset features a built-in microphone. Position the microphone appropriately for clear voice pickup. Ensure the microphone is not muted in your computer's sound settings or via any physical mute switch on the headset/cable (if present).

## MAINTENANCE

---

- **Cleaning:** Use a soft, dry cloth to clean the headset. Do not use abrasive cleaners or solvents.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures.
- **Cable Care:** Avoid sharp bends or kinks in the cable to prevent damage.
- **Ear Cushions:** The ear cushions are designed for comfort and can be gently wiped clean.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
No Sound from Headset	Incorrect audio output device selected; Volume too low; Loose connection.	Check your computer's sound settings and select the headset as the default output. Increase volume. Ensure 3.5mm jack is fully inserted.
Microphone Not Working	Microphone muted; Incorrect input device selected; Software issues.	Check for a physical mute switch on the cable. Verify headset is selected as default input in sound settings. Restart application or computer.
LED Lights Not On	USB cable not connected or not receiving power.	Ensure the USB cable is securely plugged into a working USB port. Try a different USB port.

## SPECIFICATIONS

---
