- Familiarize yourself with local e-bike regulations and traffic laws.
- Do not ride under the influence of alcohol or drugs.
- Avoid riding in adverse weather conditions or on excessively rough terrain if you are not experienced.
- Ensure all quick releases and bolts are properly tightened before riding.

OPERATING INSTRUCTIONS

Powering On/Off

- To power on the bike, press and hold the power button on the display unit.
- To power off, press and hold the power button again until the display turns off.

Pedal Assist System (PAS)

The Totem Osprey offers 5 levels of pedal assist. Use the '+' and '-' buttons on the control panel to adjust the assist level. Higher levels provide more motor assistance.

Charging the Battery

- The battery can be charged while installed on the bike or removed.

- Connect the charger to the battery charging port, then plug the charger into a standard wall outlet.
- A full charge typically takes 4-6 hours. The charger indicator light will change when charging is complete.
- Always use the original charger provided by Totem.

Shifting Gears

Use the Shimano shifters on the handlebars to change gears. Shift gears smoothly and avoid shifting under heavy load to prevent damage to the drivetrain. Practice shifting in a safe area before riding on varied terrain.

Braking

The hydraulic disc brakes provide strong and consistent stopping power. Apply both front and rear brakes simultaneously for optimal control and stopping distance. Avoid sudden, hard braking, especially with the front brake, to prevent skidding.

MAINTENANCE

Regular maintenance is crucial for the longevity and safe operation of your e-bike.

- **Tire Pressure:** Check tire pressure before each ride. Recommended pressure is typically found on the tire sidewall.
- **Brakes:** Regularly inspect brake pads for wear and ensure brake levers feel firm. Adjust or replace as needed.
- **Chain:** Keep the chain clean and lubricated to ensure smooth shifting and prevent premature wear.
- **Bolts and Fasteners:** Periodically check all bolts and fasteners for tightness, especially on critical components like the handlebars, stem, wheels, and seat post.
- **Battery Care:** Store the battery in a cool, dry place. If storing for extended periods, charge it to 50-70% every few months.
- **Cleaning:** Clean the bike with a damp cloth and mild soap. Avoid high-pressure washing directly on electrical components.
