AZDOME AZDOME M330

AZDOME M330 Dash Cam User Manual

Your comprehensive guide to operating and maintaining your AZDOME M330 Dash Cam.

1. PRODUCT OVERVIEW

The AZDOME M330 is a compact 1080P Mini Dash Cam designed for vehicle security and recording. It features built-in WiFi for easy access via the AZDOME APP, smart voice control, fatigue driving reminders, and enhanced night vision capabilities. The device supports 24-hour parking mode and loop recording, ensuring continuous coverage.

2. WHAT'S IN THE BOX

Upon unboxing your AZDOME M330 Dash Cam, verify that all components are present:

- AZDOME M330 Dash Cam x1
- Type-C car charger with 3.5m/12ft cable x1
- Electrostatic Sticker x2
- Cable Clip x5
- Pry tool x1
- User Manual x1

3. SETUP GUIDE

3.1. Inserting the SD Card

An SD card (not included) is required to store recordings. The AZDOME M330 supports up to 128GB. For reliable performance, a Class 10 or U3 micro SD card from a reputable brand like SanDisk is recommended. Format the SD card with the dash cam before first use and reformat monthly.

Figure 3: Location for SD card insertion on the dash cam.

3.2. Mounting the Dash Cam

The M330 dash cam comes with a 3M sticky mount for easy installation. Choose a location on your windshield that does not obstruct your view. The rotatable mount allows for perfect angle adjustment to ensure optimal recording coverage.

Figure 4: Dash cam mounted discreetly behind the rearview mirror.

Your browser does not support the video tag.

Video 1: Demonstrates the installation process of the AZDOME M330 dash cam, including mounting and cable routing.

3.3. Power Connection

Connect the Type-C car charger to the dash cam and plug the other end into your vehicle's cigarette lighter port. The dash cam requires continuous power to operate. For 24-hour parking mode, a hardwire kit (not included) is necessary.

Figure 5: Dash cam connected to power source in a vehicle.

3.4. App Installation and WiFi Connection

Download the "AZDOME" app from your device's app store. The dash cam features built-in WiFi, allowing you to view, share, and download videos in real-time. Ensure your phone's cellular data is turned off when connecting to the dash cam's WiFi network to prevent connectivity issues.

Your browser does not support the video tag.

Video 2: Overview of the AZDOME M330 dash cam's functions, including app connectivity and settings.

4. OPERATING INSTRUCTIONS

4.1. Basic Recording and Loop Recording

Once powered on, the dash cam automatically begins recording. It features loop recording, which continuously records video in segments (e.g., 1, 2, or 3 minutes). When the SD card is full, the oldest unlocked files are overwritten to make space for new recordings.

G-Sensor & Loop Recording

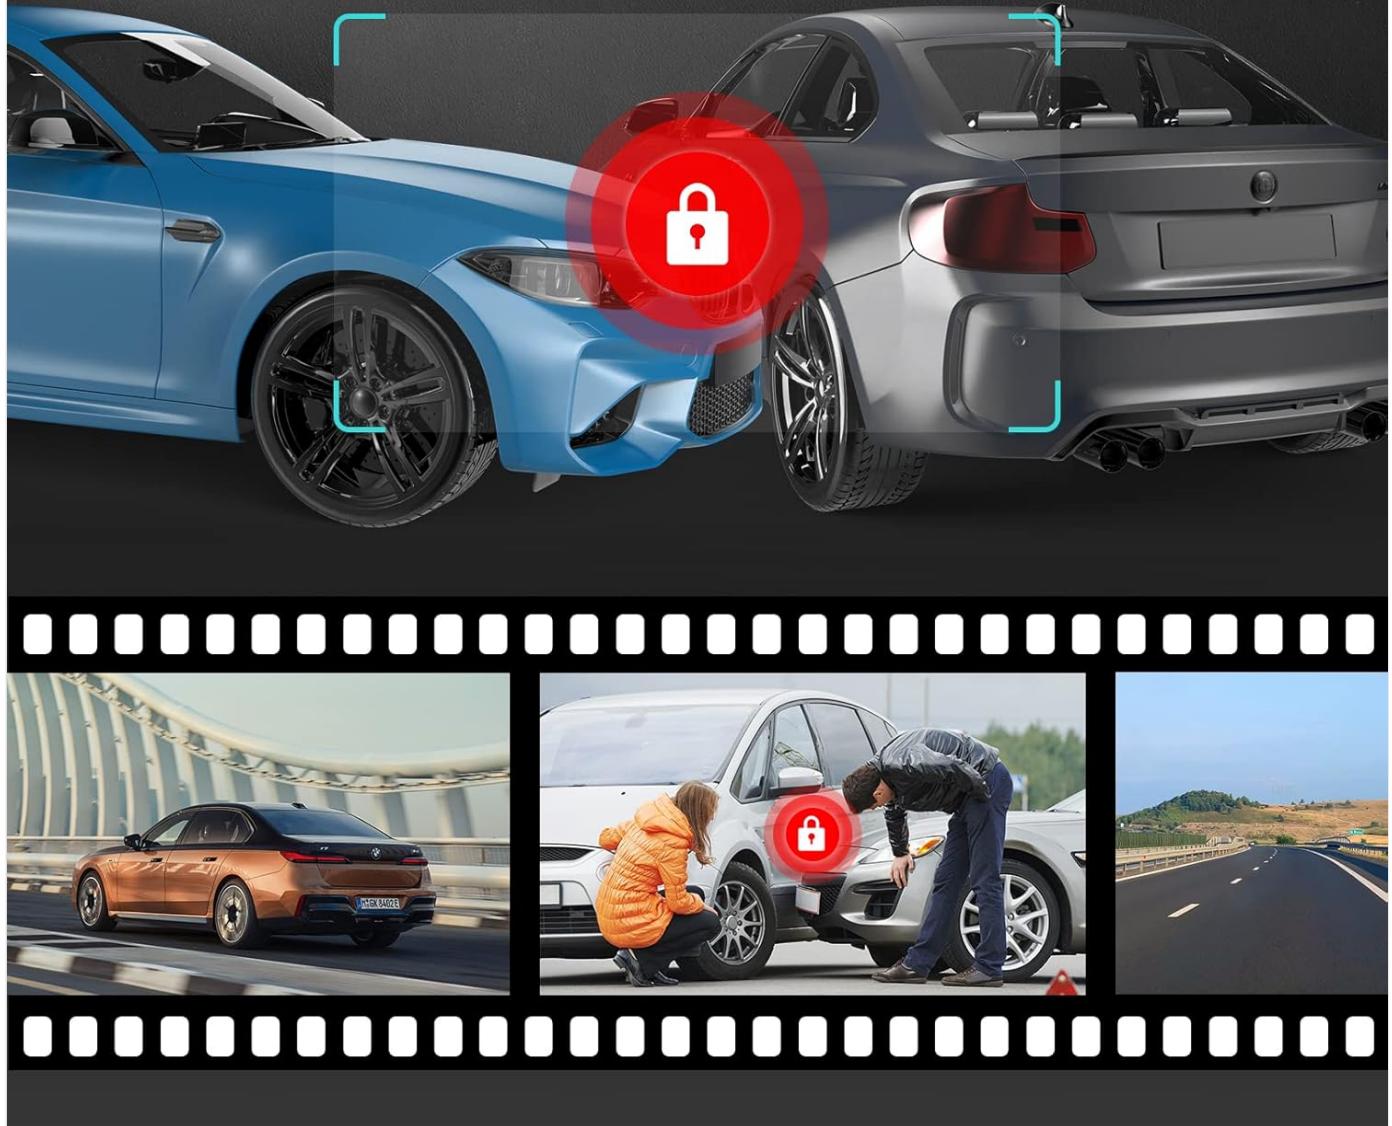

Figure 7: G-sensor and loop recording ensure important footage is captured and saved.

4.2. Smart Voice Control

The M330 dash cam supports 8 types of voice commands for hands-free operation, enhancing driving safety and convenience. Examples include "Take picture" and "Turn on WiFi".

24H Parking Monitor

Support 24 hours recording only when it is connected to a hardwire kit (not included)

Figure 8: Voice control allows for hands-free operation while driving.

4.3. G-Sensor Functionality

The built-in G-sensor detects sudden movements or collisions. In the event of an impact, the G-sensor automatically locks the current video segment to prevent it from being overwritten by loop recording. The sensitivity of the G-sensor can be adjusted via the AZDOME app settings (Low, Medium, High).

4.4. 24H Parking Mode

The M330 offers two parking modes for continuous surveillance when your vehicle is parked:

- **Collision Detection Parking Mode:** The G-sensor detects impacts and records video.
- **Time-Lapse Parking Mode:** The camera records continuously for 24 hours (requires a hardwire kit, not included).

Smart Voice

You can say a command, but ONLY support English

Figure 9: The 24-hour parking monitor provides continuous surveillance.

4.5. Super Night Vision

Equipped with WDR (Wide Dynamic Range) technology and a 6-glass lens, the M330 delivers clear video recordings even in low-light conditions, ensuring visibility of road signs and license plates day or night.

5. MAINTENANCE

To ensure optimal performance and longevity of your AZDOME M330 Dash Cam:

- **SD Card Formatting:** Reformat your SD card monthly using the dash cam's settings to prevent data corruption and ensure smooth recording.
- **Cleaning:** Gently wipe the lens and body of the dash cam with a soft, dry cloth. Avoid using abrasive cleaners or solvents.
- **Temperature:** The dash cam is designed to operate in extreme weather conditions from -4°F to 158°F. However, prolonged exposure to direct sunlight in extremely hot conditions may affect performance.

6. TROUBLESHOOTING

If you encounter issues with your AZDOME M330 Dash Cam, refer to the following common problems and solutions:

- Dash Cam Not Powering On:** Ensure the car charger is securely plugged into both the dash cam and the vehicle's cigarette lighter port. Check if the vehicle's power outlet is active.
- Recording Stops Unexpectedly:** This can be caused by a full or corrupted SD card. Format the SD card regularly. Ensure you are using a Class 10 or U3 micro SD card.
- G-Sensor Too Sensitive/Not Sensitive Enough:** Adjust the G-sensor sensitivity setting via the AZDOME app (Low, Medium, High) to match your driving conditions and preferences.
- WiFi Connectivity Issues:** When connecting to the dash cam's WiFi, ensure your phone's cellular data is temporarily disabled. This prevents your phone from trying to use mobile data instead of the dash cam's WiFi.
- Video Quality Issues (Choppy Video):** Ensure your SD card is of sufficient speed (Class 10 or U3). Reformatting the card can also help.
- Power Cable Length:** The included 3.5m/12ft cable is designed to be long enough for most installations, allowing for discreet routing along the headliner and A-pillar. If a longer cable is required for your specific vehicle, third-party options may be available.

7. SPECIFICATIONS

Feature	Detail
Product Dimensions	5.51 x 2.36 x 4.72 inches
Item Weight	7.4 ounces
Model Number	AZDOME M330
Batteries	1 Lithium Ion batteries required (included)
Connectivity Technology	Wi-Fi
Special Features	G-Sensor, Parking Monitor, Voice Control, Automatic Incident Detection, Built-In GPS
Color	Black
Video Capture Resolution	1080p
Mounting Type	Windshield Mount

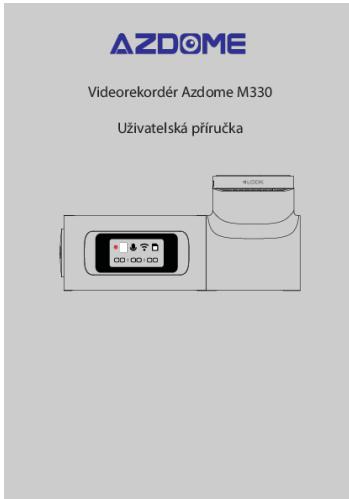

8. WARRANTY AND SUPPORT

The AZDOME M330 dashboard camera includes a 12-month warranty and 24/7 technical support. If you encounter any problems with the product or require after-sales service, please email AZDOME. The R&D team aims to provide feedback within 24 working hours.

For firmware updates, PDF user manuals, and camera accessories, AZDOME provides support. Contact information can typically be found in the included user manual or on the official AZDOME website.
