7. MAINTENANCE

To ensure the longevity and appearance of your Nandae storage shelf, follow these simple maintenance tips:

- **Cleaning:** Wipe the shelf regularly with a dry, soft cloth to remove dust and dirt. For stubborn marks, a slightly damp cloth can be used, followed immediately by a dry cloth to prevent water spots or rust.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners, strong detergents, or chemical solvents, as these can damage the painted finish.
- **Check Stability:** Periodically check all screws and connections to ensure they remain tight. Retighten if necessary.
- **Prevent Rust:** While the shelf has an anti-rust finish, prolonged exposure to excessive moisture or humidity should be avoided, especially in areas with poor ventilation.

8. TROUBLESHOOTING

If you encounter any issues with your Nandae 5-Tier Storage Shelf, consider the following common solutions:

- **Shelf Wobbles:**

- Ensure the shelf is placed on a flat, level surface.
- Check that all assembly screws are fully tightened.
- Adjust the non-slip foot pads to compensate for uneven flooring.

- **Items Falling Off:**

- Verify that the anti-falling baffles are correctly installed and facing upwards.
- Ensure items are placed within the confines of the shelf and not overhanging.
