Hafenpo 18 Inch Full Bed Frame Instruction Manual

Model: 4020-18-F

IMPORTANT SAFETY INFORMATION

Please read and understand all instructions before assembly and use of this product. Failure to follow these instructions may result in injury or damage to the product.

- **Weight Capacity:** Do not exceed the maximum weight capacity of the bed frame. Exceeding this limit may compromise the structural integrity and pose a hazard.
- **Proper Assembly:** Ensure all components are correctly assembled and all fasteners are securely tightened. Improper assembly can lead to instability or collapse.
- **Regular Checks:** Periodically inspect all connections and support legs to ensure they remain tight and stable.
- **Level Surface:** Always place the bed frame on a flat, level surface to prevent wobbling and ensure stability.
- **Children Safety:** Keep small parts and packaging materials away from children during assembly to prevent choking hazards.

PARTS LIST

Before beginning assembly, verify that all parts listed below are present and undamaged. If any parts are missing or damaged, please contact Hafenpo customer support.

Part	Description	Quantity
A	Main Frame Sections	2
B	Support Legs	6
C	Cross Bars / Slats	Multiple
D	Center Support Bar	1
E	Hardware Pack (Bolts, Washers, Allen Wrench)	1 Set
F	Plastic Caps for Legs	6

Note: The exact number and type of parts may vary slightly. Refer to the diagram in your package for precise identification.

SETUP AND ASSEMBLY

The Hafenpo 18 Inch Full Bed Frame is designed for easy and quick assembly. All necessary tools are included in the package. It is recommended to assemble the frame with two people for optimal ease and safety.

- 1. Unpack Components:** Carefully remove all parts from the packaging and lay them out on a clean, soft surface (like a rug or blanket) to prevent scratches. Identify each part using the provided parts list and diagrams.
- 2. Assemble Main Frame:** Connect the main frame sections (Part A) according to the instructions, ensuring the pre-drilled holes align. Secure them using the bolts and washers from the hardware pack (Part E). Do not fully tighten bolts until all sections are loosely connected.
- 3. Attach Support Legs:** Attach the support legs (Part B) to the designated points on the main frame. Ensure the legs are oriented correctly for stability. Insert the plastic caps (Part F) onto the bottom of each leg to protect your flooring.
- 4. Install Center Support:** Place the center support bar (Part D) into its designated position, connecting the two halves of the frame. This bar is crucial for distributing weight and preventing sagging.
- 5. Insert Cross Bars/Slats:** Lay the cross bars or slats (Part C) across the frame, fitting them into the designated slots or attaching them as per the design. These provide direct support for your mattress.
- 6. Final Tightening:** Once all components are in place and loosely assembled, go back and securely tighten all bolts using the provided Allen wrench. Ensure all connections are firm and stable.
- 7. Positioning:** Carefully move the assembled bed frame to its desired location. Ensure it is on a level surface.

OPERATING (USAGE)

The Hafenpo 18 Inch Full Bed Frame is designed for optimal comfort and functionality without the need for a box spring.

- **No Box Spring Required:** This platform bed frame provides direct support for your mattress, eliminating the need for a traditional box spring. Simply place your mattress directly onto the metal slats.
- **Under-Bed Storage:** With an 18-inch height, the frame offers approximately 16.1 inches of clearance underneath, providing ample space for storage. This allows you to store various items, helping to keep your room tidy and organized.
- **Noise Reduction Design:** The sturdy metal construction and secure connections are engineered to minimize noise from activity, ensuring a quiet and undisturbed sleep environment.

MAINTENANCE

Regular maintenance will help prolong the life and ensure the continued stability of your Hafenpo bed frame.

- **Cleaning:** Wipe down the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the powder-coated finish.
- **Check Connections:** Periodically (e.g., every 3-6 months) re-tighten all bolts and screws to ensure the frame remains stable and free from wobbling or squeaking.
- **Inspect for Damage:** Regularly check the frame for any signs of wear, bending, or damage. If any issues are found, discontinue use and contact customer support.

TROUBLESHOOTING

If you encounter any issues with your Hafenpo bed frame, refer to the common solutions below. If the problem persists, please contact customer support.

Problem	Possible Cause	Solution
Squeaking Noise	Loose bolts or connections.	Re-tighten all bolts and screws on the frame. Ensure the center support bar is securely in place.
Frame Wobbles / Unstable	Uneven floor surface; loose connections; incorrect assembly.	Ensure the frame is on a level surface. Check and re-tighten all bolts. Verify that all parts are assembled according to the instructions.
Mattress Slides	Smooth surface of slats; mattress material.	Consider placing a non-slip mat or rug gripper between the mattress and the slats.
Missing Parts	Packaging error.	Contact Hafenpo customer support immediately with your purchase details.

SPECIFICATIONS

Model: 4020-18-F

Size: Full

Product Dimensions: 74.5"L x 53.5"W x 18"H

Under-Bed Clearance: Approximately 16.1 Inches

Color: Black

Finish Type: Powder Coated

Material: High-quality Metal

Special Feature: Squeak Resistant

Assembly Required: Yes

Manufacturer: Hafenpo

Item Weight: 31.9 pounds
