**Vibration sensor FAQ**

**1 How to turn off the siren of the vibration sensor?**  
Please open the battery cover, and turn on/off the siren switch.

**2 How to set the sensitivity of the vibration sensor?**  
Please open the battery cover, and set the sensitivity with the sensitivity switch.

**3 How to factory reset the vibration sensor?**  
Please open the battery cover, long press the reset button for 5 seconds until the LED light turns red, release the reset button and the LED light turns blue blinking, indicating it enters Zigbee pairing mode.

**4 The vibration sensor becomes unresponsive or goes offline sometimes, what should I do?**  
There are some common factors that can affect Zigbee connections, please try a few things for general Zigbee troubleshooting:  
- Make sure no battery level issue for the Zigbee device.  
- Place the Zigbee device near the Zigbee hub or the Zigbee repeater, we suggest no more than 12 meters in open space.  
- Clear the area around your Zigbee hub. Move any wireless devices like Wi-Fi routers, or other hubs at least a meter away from the hub. These devices can sometimes mess with Zigbee signals.  
- Check your Wi-Fi router settings: Some Wi-Fi routers can interfere with Zigbee signals if they're on the same channel. See if you can change your Wi-Fi router channel to a different one (maybe channel 1 or 6) and see if that helps.  
- Check your Zigbee hub manual for troubleshooting Zigbee connection issues.

**5 Which smart home hub is the vibration sensor compatible with?**  
The Third Reality vibration sensor follows Zigbee 3.0 protocol, works with compatible Zigbee hubs or Echo devices with Zigbee hubs built in such as Echo (4th Gen), Echo Plus (3rd Gen and 2nd Gen), Echo Studio, Echo Show 8 3rd Gen, Echo Show 10 2nd Gen/3rd Gen, Echo Hub, Sero 6, Sero Pro 6, Home Assistant (ZHA/Zigbee2mqtt), SmartThings Hub V2005/V3006, SmartThings Station, AeoTec Smart Home Hub, Hubitat Elevation, Honey BridgePro, Third Reality Smart Hub/Smart Bridge.

**6 Is it compatible with Apple Home/Google Home?**  
Yes, it is compatible with Apple Home and Google Home through the Third Reality Smart Bridge(sold separately).
