Hafenpo Twin 18 Inch

Hafenpo 18 Inch Twin Bed Frame Instruction Manual

Model: Twin 18 Inch

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, maintenance, and troubleshooting of your Hafenpo 18 Inch Twin Bed Frame. Please read this manual thoroughly before assembly and retain it for future reference.

The Hafenpo 18 Inch Twin Bed Frame is designed for durability and ease of use, featuring a sturdy metal platform construction that eliminates the need for a box spring and provides ample under-bed storage.

SAFETY INFORMATION

- Ensure all parts are present and undamaged before beginning assembly. Do not use if any parts are missing or broken.
- Assemble the bed frame on a soft, clean surface (e.g., carpet or cardboard) to prevent scratching.
- Do not overtighten screws during assembly. Hand-tighten first, then secure firmly.
- Keep small parts away from children during assembly to prevent choking hazards.
- Regularly check all connections to ensure they remain tight and secure.
- Do not exceed the recommended weight capacity of the bed frame.

PACKAGE CONTENTS

Before assembly, verify that all components listed below are included in your package:

- Headboard/Footboard Legs (A, B)
- Side Rails (C, D)
- Support Slats (E)
- Center Support Bar (F)
- Support Legs (G)
- Hardware Pack (Screws, Washers, Allen Wrench)

SETUP AND ASSEMBLY

Follow these steps carefully for proper assembly. It is recommended to have two people for assembly.

1. Step 1: Assemble the Headboard and Footboard Sections.

Connect the Headboard Legs (A) and Footboard Legs (B) to their respective crossbars using the provided screws and Allen wrench. Ensure all connections are snug but do not fully tighten yet.

2. Step 2: Attach Side Rails.

Attach the Side Rails (C and D) to the assembled Headboard and Footboard sections. Align the holes and insert screws, securing them loosely for now.

3. Step 3: Install Center Support Bar and Legs.

Place the Center Support Bar (F) down the middle of the frame. Attach the Support Legs (G) to the Center Support Bar and to the frame's side rails as indicated in the diagram. Ensure the legs are oriented correctly for stability.

4. **Step 4: Place Support Slats.**

Lay the Support Slats (E) across the frame, fitting them into the designated slots or attaching them with the provided fasteners. Distribute them evenly to ensure proper mattress support.

5. Step 5: Final Tightening.

Once all parts are assembled and aligned, go back and securely tighten all screws using the Allen wrench. Ensure the frame is stable and does not wobble.

OPERATING INSTRUCTIONS

The Hafenpo 18 Inch Twin Bed Frame is designed to support a standard twin-size mattress without the need for a box spring. Simply place your mattress directly onto the metal slats.

- **Weight Capacity:** Do not exceed the maximum recommended weight capacity for a twin bed frame, typically around 300-350 lbs (including mattress and occupants). Refer to product packaging or manufacturer's website for precise limits.
- **Under-Bed Storage:** The 18-inch height provides significant clearance for under-bed storage. Utilize this space for bins, boxes, or other items to maximize room organization.
- **Noise Reduction:** The frame is designed with noise reduction features. If any squeaking occurs, re-check all tightened connections.

Image: The Hafenzo Twin Bed Frame with a storage box placed underneath, demonstrating the generous 18-inch under-bed clearance.

MAINTENANCE

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners that could damage the powder-coated finish.
- **Inspection:** Periodically (e.g., every 3-6 months) inspect all bolts and connections to ensure they remain tight. Retighten if necessary to maintain stability and prevent noise.
- **Moving:** When moving the bed frame, lift it rather than dragging it to prevent damage to the frame or your flooring.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Bed frame wobbles or is unstable.	Loose connections or uneven assembly.	Ensure all bolts are fully tightened. Check that the frame is on a level surface.
Squeaking noises.	Loose bolts or friction between metal parts.	Retighten all bolts. Apply a small amount of lubricant (e.g., silicone spray) to connection points if squeaking persists.
Missing parts.	Packaging error or parts lost during unboxing.	Carefully check all packaging materials. Contact Hafenpo customer support for replacement parts.

SPECIFICATIONS

Feature	Detail
Model	Twin 18 Inch
Size	Twin
Product Dimensions (L x W x H)	74.5"L x 37.5"W x 18"H
