

## THE HEAT COMPANY 12003

# THE HEAT COMPANY Hand Warmer XL Instruction Manual

## 1. INTRODUCTION

Thank you for choosing THE HEAT COMPANY Hand Warmer XL. These air-activated hand warmers are designed to provide reliable and long-lasting warmth for various outdoor activities. Made with 100% natural ingredients, they offer over 24 hours of heat to keep your hands comfortable in cold conditions.

### Key Features:

- Provides over 24 hours of continuous warmth.
- Utilizes 100% natural, air-activated ingredients.
- Compact size (approximately 13 x 10 cm) fits comfortably in pockets.
- Ideal for winter sports, outdoor work, and cold weather activities.

## 2. SETUP AND ACTIVATION

THE HEAT COMPANY Hand Warmers are air-activated. Follow these steps to activate them:

1. **Open the Packaging:** Remove the hand warmer from its airtight outer packaging. Do not open the non-woven fabric pouch containing the warming ingredients.

Image: Hands opening the sealed outer packaging of the hand warmer.

2. **Air Activation:** Once exposed to air, the hand warmer will automatically begin to heat up. It may take a few minutes for the warmer to reach its optimal temperature. For faster activation, gently shake or knead the warmer.

### 3. OPERATING INSTRUCTIONS

Once activated, the hand warmer will provide continuous heat for over 24 hours. For best results, place the warmer in an enclosed space, such as a glove, mitten, or pocket, to retain heat effectively.

- **Placement:** Insert the activated hand warmer into your gloves, mittens, or jacket pockets. The enclosed environment helps to maximize and maintain the heat output.

Image: A hand placing the activated hand warmer into a jacket pocket for optimal warmth retention.

- **Duration:** The hand warmer is designed to provide warmth for more than 24 hours. The exact duration may vary slightly depending on ambient temperature and air exposure.
- **Reactivation (Temporary):** If the warmer feels less warm, expose it to air briefly and gently shake it. Placing it back into an enclosed space will help it regain heat.

## 4. STORAGE AND DISPOSAL

Proper handling ensures product longevity and environmental responsibility.

- **Storage:** Store unopened hand warmers in a cool, dry place, away from direct sunlight and moisture. Ensure the outer packaging remains sealed until use. Unopened warmers can be stored for many months.
- **Disposal:** After use, the hand warmers can be disposed of with regular household waste. The ingredients are natural and environmentally friendly. The outer packaging is recyclable.

## 5. TROUBLESHOOTING

If you encounter any issues with your hand warmers, consider the following:

- **Warmer not heating up:** Ensure the warmer has been removed from its airtight packaging and exposed to air. Gently shake or knead it to initiate the reaction. Allow 15-30 minutes for full heat development.
- **Reduced warmth:** If the warmer feels less warm, it might be due to insufficient air circulation or extreme cold. Briefly expose it to air, shake it, and place it back into an enclosed space like a pocket or glove.
- **Overheating:** While rare, if the warmer feels excessively hot, remove it from direct contact with skin. It is generally recommended to use hand warmers inside gloves or pockets, not directly against bare skin.

## 6. PRODUCT SPECIFICATIONS

Feature	Detail
Model Number	12003
Dimensions (L x W)	Approximately 13 x 10 cm
Heat Duration	24+ hours
Activation Method	Air-activated (chemical reaction)
Ingredients	Natural ingredients
Quantity per pack	10 pieces
Recommended Use	For all outdoor activities
Reusability	Single use
