PACKAGE CONTENTS

- SteelSeries Arctis Nova 7X Wireless Multi-Platform Gaming & Mobile Headset
- USB-C Wireless Dongle
- USB-C to USB-A Cable

SETUP

Initial Charging

Before first use, fully charge the headset. Connect the included USB-C to USB-A cable to the headset's USB-C port and a powered USB port (e.g., computer, wall adapter). A 15-minute charge provides approximately 6 hours of play, with a full charge offering up to 38 hours of battery life.

Wireless Connection (2.4GHz)

1. Insert the USB-C wireless dongle into a compatible port on your PC, PlayStation, Switch, or Xbox console. For Xbox, ensure the dongle is set to Xbox mode if there's a switch (refer to the dongle for specific markings).

2. Power on the headset by pressing and holding the power button. The headset should automatically pair with the dongle.

3. Verify the connection by checking the headset's indicator light (refer to the LED indicator section in the full manual for details).

Bluetooth Connection

The Arctis Nova 7X supports Bluetooth 5.0 for mobile devices and other Bluetooth-enabled platforms.

1. With the headset powered on, press and hold the Bluetooth button (or power button, depending on model variant) until the LED indicator flashes, indicating pairing mode.

2. On your mobile device, navigate to Bluetooth settings and select "Arctis Nova 7X" from the list of available devices.

3. Once paired, the LED indicator will change to a solid color.

OPERATING INSTRUCTIONS

Controls Overview

The headset features intuitive controls for media playback, volume, and microphone functions. Specific button layouts can be found on the earcups.

Figure 3: Side view of the headset highlighting control placement.

- **Volume Wheel:** Adjusts overall audio volume.
- **ChatMix Dial:** Balances game audio and chat audio (PC/PlayStation compatible).
- **Microphone Mute Button:** Toggles microphone on/off.
- **Power Button:** Powers the headset on/off, also used for Bluetooth pairing.
- **Bluetooth Button:** Initiates Bluetooth pairing and controls media playback (play/pause, skip).

Dual Audio Streams

The Arctis Nova 7X allows simultaneous audio from two sources: one via the 2.4GHz wireless dongle (e.g., game audio from PC/console) and another via Bluetooth (e.g., calls or music from a mobile device). This feature enables users to mix game audio with mobile audio seamlessly.

Retractable Microphone

The ClearCast microphone is fully retractable into the earcup when not in use, providing a sleek profile for travel or listening to music. Extend the microphone for clear voice communication during gaming or calls.

Spatial Audio

Experience 360° Spatial Audio for enhanced immersion and situational awareness in games. This feature is compatible with Tempest 3D Audio for PS5 and Microsoft Spatial Sound on Xbox/PC, providing precise sound positioning.

MAINTENANCE

Cleaning

Wipe the headset surfaces with a soft, dry cloth. For ear cushions, gently wipe with a damp cloth and allow to air dry completely before use. Avoid using harsh chemicals or abrasive materials.

Storage

Store the headset in a cool, dry place away from direct sunlight and extreme temperatures. When not in use for extended periods, ensure the headset is fully charged to preserve battery health.

Battery Care

To maximize battery lifespan, avoid fully discharging the headset frequently. Charge the headset regularly, even if not in constant use.

TROUBLESHOOTING

- **No Audio** / **Disconnecting Wireless:**

  Ensure the USB-C wireless dongle is securely connected to your device and the headset is powered on and paired. Try moving the dongle to a different USB port or closer to the headset to minimize interference. If experiencing frequent disconnections, ensure no other 2.4GHz devices are causing interference nearby.

- **Microphone Not Working:**

  Check if the microphone mute button is engaged. Ensure the microphone is fully extended. Verify microphone input settings on your PC or console.

- **Poor Sound Quality:**

  Ensure the headset is fully charged. Check audio settings on your device. For PC users, consider installing the SteelSeries GG software for advanced EQ options and firmware updates.

- **Headset Not Comfortable** / **Loose Fit:**

  Adjust the steel headband for optimal fit. The headset is designed for a comfortable, lighter fit, which may feel less "clamped" than some other models. Ensure earcups are properly positioned over your ears.
