Setup and Assembly

Assembly is required for this bed frame. Please ensure all components are present before beginning. It is recommended to have two people for assembly.

1. **Unpack Components:** Carefully remove all parts from the packaging. Lay them out on a soft, clean surface to prevent scratches. Verify all hardware and components are present against the included parts list.
2. **Attach Side Rails to Headboard:** Align the side rails with the pre-drilled holes on the headboard. Secure them using the provided bolts and washers. Do not fully tighten bolts until all major components are assembled.
3. **Attach Side Rails to Footboard:** Repeat the process for attaching the side rails to the footboard, ensuring a snug fit.
4. **Install Center Support Beam (if applicable):** If your model includes a center support beam, install it now according to the diagrams, ensuring it is securely fastened to both the headboard and footboard.
5. **Place Slats:** Position the wooden slats across the bed frame, ensuring they are evenly spaced and secured to the side rails. Some models may require screwing the slats into place.
6. **Final Tightening:** Once all components are in place and aligned, fully tighten all bolts and screws. Do not overtighten.
7. **Box Spring Requirement:** This bed frame requires a box spring for proper mattress support.
