INTRODUCTION

This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your Zerodis Manual Hand Mixer. Please read this manual thoroughly before first use and retain it for future reference.

IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of injury or damage, always follow basic safety precautions when using this appliance.

- Read all instructions carefully before use.
- Keep hands, hair, and clothing away from moving parts during operation.
- Do not immerse the main unit in water or other liquids.
- This appliance is not intended for use by persons with reduced physical, sensory, or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Use only attachments recommended by the manufacturer.
- Clean thoroughly after each use.

PRODUCT OVERVIEW

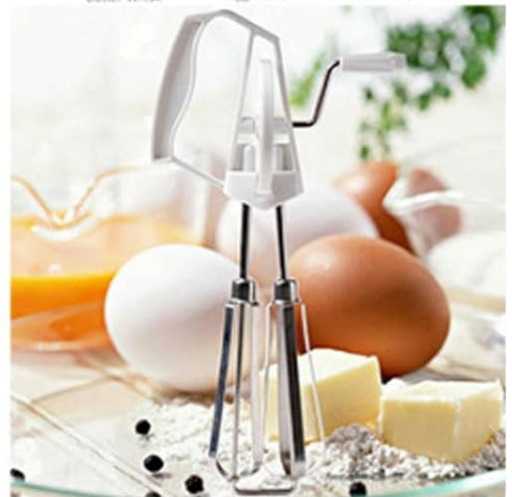

The Zerodis Manual Hand Mixer is designed for efficient mixing of various ingredients such as eggs, flour, and batters. Its hand-crank and dual whisk design provide effective mixing without the need for electricity.

SETUP

The Zerodis Manual Hand Mixer comes pre-assembled and ready for use. No complex setup is required.

1. **Unpacking:** Carefully remove the hand mixer from its packaging.
2. **Initial Cleaning:** Before first use, wash the stainless steel whisks and the lower plastic housing with warm soapy water. Rinse thoroughly and dry completely. The upper orange handle and gear mechanism should be wiped clean with a damp cloth.
3. **Inspection:** Inspect the mixer for any signs of damage from shipping. Ensure the hand crank rotates smoothly and the whisks are securely attached.

OPERATING INSTRUCTIONS

Follow these steps for effective use of your manual hand mixer:

1. **Prepare Ingredients:** Place your ingredients (e.g., eggs, batter, cream) into a suitable mixing bowl.
2. **Position Mixer:** Hold the mixer firmly by the main handle. Position the stainless steel whisks into the ingredients in the mixing bowl.
3. **Begin Mixing:** With your other hand, turn the hand crank clockwise. The internal gears will cause the whisks to rotate rapidly, mixing the ingredients.
4. **Maintain Stability:** Keep the whisks submerged in the ingredients to prevent splashing and ensure consistent mixing.
5. **Continue Mixing:** Continue cranking until the desired consistency is achieved. The auto-rotation feature ensures

efficient mixing with minimal effort.

6. **Finish:** Once mixing is complete, lift the mixer from the bowl.

CARE AND MAINTENANCE

Proper care ensures the longevity and performance of your hand mixer.

- **Cleaning:**
 - Immediately after use, rinse the whisks and lower plastic housing under running water to remove food residue.
 - Wash the whisks and lower housing with warm, soapy water. A brush may be used to clean between the tines of the whisks.
 - Wipe the upper orange handle and gear mechanism with a damp cloth. Do not submerge the entire unit in water.
 - Dry all parts thoroughly before storing to prevent rust on stainless steel components.
- **Storage:** Store the mixer in a clean, dry place, away from direct sunlight and extreme temperatures.
- **Lubrication:** The internal gears are designed for long-term use and generally do not require lubrication. If the crank becomes stiff over time, a small amount of food-grade lubricant can be applied to the gear teeth, ensuring it does not come into contact with food.

TROUBLESHOOTING

If you encounter issues with your hand mixer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Whisks not rotating smoothly.	Food residue caught in gears or whisks.	Clean the mixer thoroughly, paying attention to the area where the whisks connect to the gear mechanism.
Crank is stiff or hard to turn.	Lack of lubrication or internal debris.	Ensure the mixer is clean. If stiffness persists, apply a small amount of food-grade lubricant to the gear teeth.
Whisks detach during use.	Improper attachment or damage.	Ensure whisks are fully inserted and locked into place. If they continue to detach, the mixer may be damaged and require replacement.

If the problem persists after attempting these solutions, please contact customer support.
