4. TROUBLESHOOTING

If you experience issues with your VTech CS1501 phone, try the following troubleshooting steps:

Problem	Solution
No dial tone	Ensure the telephone line cord is securely connected to the base unit and wall jack. Check that the AC adaptor is properly plugged into the base unit and a working power outlet. Try connecting a different phone to the wall jack to confirm the line is active.
Cannot make or receive calls	Verify the handset is charged and registered to the base unit. Check if the call block feature is active for the incoming number. Ensure there are no service outages with your telephone provider.
Poor sound quality (static, crackling)	Move the handset closer to the base unit. Relocate the base unit away from other electronic devices (e.g., Wi-Fi routers, microwaves) that may cause interference. Check for loose connections of the telephone line cord or AC adaptor.
Handset displays "Unregistered"	Follow the handset registration steps outlined in the Quick Start Guide. Ensure the base unit is powered on.
