## MAINTENANCE

Regular maintenance of your plinth filter is essential for optimal dryer performance and energy efficiency.

- **Cleaning:** The JASCODE plinth filter is reusable and washable. Rinse the filter under clear running water to remove accumulated lint and debris. Ensure the filter is completely dry before reinserting it into the dryer. This process can take several hours.
- **Replacement Frequency:** For best results and to prevent excessive lint buildup, it is recommended to replace your plinth filter every 2 months. Having a spare filter allows for immediate replacement while the soiled filter dries.
