## 7. Troubleshooting

If you encounter issues with your Geeni Glimpse camera, please refer to the following common solutions:

### 7.1 Camera Offline / Disconnects

- Ensure the camera is powered on and connected to a stable 2.4GHz Wi-Fi network.
- Check Wi-Fi signal strength in the camera's location. Move the camera closer to the router if necessary.
- Power cycle the camera by unplugging it for 10 seconds and plugging it back in.
- Verify your router's settings to ensure it's not blocking the camera's connection or has MAC address filtering enabled.

### 7.2 Poor Video Quality

- Ensure your internet connection is stable and has sufficient bandwidth for streaming HD video.
- Clean the camera lens with a soft, dry cloth to remove any dust or smudges.
- Check the camera's resolution settings in the Geeni app (ensure it's set to 1080p for optimal quality).

### 7.3 Motion Alerts Not Received

- Verify motion detection is enabled in the Geeni app settings for the specific camera.
- Check your phone's notification settings to ensure notifications from the Geeni app are allowed.
- Adjust motion sensitivity and motion zones in the app to ensure they cover the desired areas.

### 7.4 Two-Way Audio Issues

- Ensure microphone and speaker permissions are granted to the Geeni app on your smartphone.
- Check the volume settings within the app and on your phone.
- Ensure there are no obstructions blocking the camera's microphone or speaker.
