once the frame is fully assembled.

## General Assembly Steps:

1. **Unpack and Identify Parts:** Lay out all components on a clean, soft surface (e.g., carpet or blanket) to prevent scratches. Verify all parts against the provided parts list.
2. **Assemble the Main Daybed Frame:** Connect the headboard, footboard, and side rails using the provided hardware. Ensure all connections are firm and aligned.
3. **Install Slats:** Secure the wooden slats to the main daybed frame. *Note: Some users have reported needing to drill pilot holes for slats. If you encounter this, measure accurately and use an appropriate drill bit to create pilot holes before securing the slats.*
4. **Assemble the Trundle Frame:** Construct the pull-out trundle frame, ensuring the casters are properly attached for smooth movement.
5. **Assemble Storage Drawers:** Put together the two storage drawers, attaching the bottom panels and casters. Ensure the groove handles are correctly oriented.

- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight can cause the wood finish to fade or crack.
- **Weight Distribution:** Distribute weight evenly across the bed surface to prevent undue stress on the frame and slats.

## TROUBLESHOOTING

If you encounter any issues with your DORTALA Daybed, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Drawers stick or are difficult to open/close.	Misalignment, debris in tracks, or casters not moving freely.	Check that drawers are properly aligned within their space. Clean any debris from the caster wheels and the floor. Ensure casters are securely attached and rotate freely.
Bed frame is wobbly or squeaks.	Loose bolts or screws, uneven floor.	Tighten all assembly bolts and screws. Ensure the daybed is placed on a level surface. If necessary, use shims under the legs to stabilize.
Difficulty installing slats (holes not pre-drilled).	Manufacturing variation.	Carefully measure and mark the positions for the screws. Use a small drill bit to create pilot holes before inserting screws. Exercise caution to avoid splitting the wood.
Damaged or defective parts upon arrival.	Shipping damage or manufacturing defect.	Do not attempt to force assembly with damaged parts. Contact DORTALA customer support immediately for replacement parts.
