4. SETUP INSTRUCTIONS

4.1 Placement and Screen Size

Position the projector on a stable, flat surface or mount it to the ceiling. Ensure the projection distance allows for your desired screen size. The projector supports a projection distance of 1.2m (minimum) to 6.5m (maximum), yielding a screen size from 96.5cm (38 inches) to 569cm (225 inches).

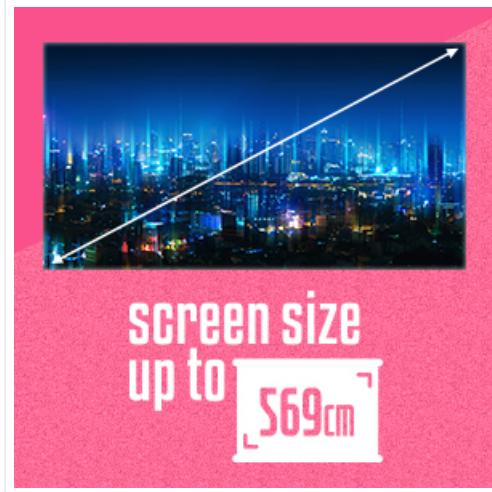

Image: A graphic illustrating the projector's capability to produce a large screen size, up to 569cm (225 inches) diagonally.

4.2 Power Connection

1. Connect the power cable to the projector's power input port.
2. Plug the other end of the power cable into a suitable electrical outlet.
3. Press the power button on the projector or remote control to turn on the device.

4.3 Focus and Keystone Adjustment

The PIXAPLAY 17 features automatic keystone correction and auto-focus technology for a clear and properly shaped image.

- **Auto Keystone:** The projector automatically adjusts the image to correct for trapezoidal distortion when placed at an angle.
- **Auto Focus:** The projector automatically sharpens the image for optimal clarity.

5. OPERATING INSTRUCTIONS

5.1 Wired Connectivity

The projector offers multiple wired input options:

- **HDMI Inputs (x2):** Connect devices such as laptops, gaming consoles, or set-top boxes using an HDMI cable.
- **USB Inputs (x2):** Connect USB storage devices to play media files directly.
- **AUX Output:** Connect external audio systems, soundbars, or speakers via a 3.5mm audio cable.

Multi-Connectivity

5.2 Wireless Connectivity

The projector supports advanced wireless options:

- **Dual Band WiFi (2.4GHz & 5GHz):** Connect to your home or office network for internet access and online streaming.
- **Bluetooth v5.1:** Pair with Bluetooth-enabled audio devices like headphones or speakers for wireless sound.

Image: A graphic illustrating the projector's dual-band WiFi capability, connecting to a router and an external speaker wirelessly.

5.3 Screen Mirroring and Casting

Share content from your mobile devices directly to the projector screen:

- **iOS Screen Mirroring:** For Apple devices, use the built-in iOS screen mirroring feature.
- **Miracast:** For Android smartphones and other compatible devices, use Miracast for wireless screen sharing.

Image: A smartphone wirelessly casting its screen content to the projector, which displays it on a large projection, illustrating the casting and mirroring function.

5.4 Smart Android Features

The projector runs on a Smart Android operating system, providing access to:

- **Built-in Apps:** Access pre-installed applications.
- **App Download Support:** Download additional apps for OTT platforms, media players, and more.
- **Internal Storage:** 32GB internal storage and 1GB RAM with a Quad-core processor for smooth performance.

5.5 Remote Control Usage

The included remote control provides full functionality for navigating the projector's interface, adjusting settings, and controlling media playback.

6. MAINTENANCE

6.1 Cleaning

To maintain optimal performance and image quality, regularly clean the projector:

- Use the provided cotton swab and cloth to gently clean the lens and exterior surfaces.
- Avoid using abrasive cleaners or solvents that could damage the projector.
- Ensure the projector is powered off and unplugged before cleaning.

6.2 LED Lamp Lifespan

The projector utilizes an LED lamp with an estimated lifespan of 30,000 hours, ensuring long-term durability and consistent picture quality.

Image: A graphic highlighting the projector's LED lamp with a 30,000-hour lifespan, positioned in a living room setting.

7. TROUBLESHOOTING

If you encounter issues with your projector, consider the following basic troubleshooting steps:

- **No Power:** Ensure the power cable is securely connected to both the projector and the power outlet. Check if the power button is pressed.
- **No Image:** Verify the input source is correctly selected. Check HDMI or USB cable connections. Ensure the lens cap is removed.
- **Blurry Image:** Allow the auto-focus to adjust. If needed, manually adjust focus via the remote or on-screen settings.
- **Distorted Image:** The auto-keystone correction should adjust automatically. If not, check for manual keystone adjustment options in the settings.
- **No Sound:** Check the volume level on the projector and any connected audio devices. Ensure external speakers are properly connected if using the AUX output. Verify Dolby Audio settings if playing Dolby-enabled content.
- **Connectivity Issues:** For WiFi, ensure the network password is correct and the signal is strong. For Bluetooth, ensure the device is in pairing mode and within range.

For persistent issues, refer to the detailed user guide provided via QR code or contact ZEBRONICS customer support.
