4. MAINTENANCE

Proper care will extend the life and appearance of your Moimhear Daybed.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid using harsh chemicals, abrasive cleaners, or polishes that may damage the finish.
- **Wood Care:** Protect the wood from direct sunlight and extreme temperature changes, which can cause fading or cracking.
- **Fasteners:** Periodically check all screws and bolts to ensure they remain tight. Re-tighten as necessary to maintain the bed's stability.
- **Mattress Care:** Rotate and flip your mattress regularly according to the mattress manufacturer's recommendations to ensure even wear.

5. TROUBLESHOOTING

If you encounter any issues with your Moimhear Daybed, consider the following:

- **Instability or Wobbling:** Ensure all assembly screws and bolts are securely tightened. Check that the bed is placed on a level surface. Uneven flooring can cause wobbling.
- **Drawers or Trundle Not Sliding Smoothly:** Check for any obstructions in the tracks or under the rollers. Ensure the rollers are clean and free of debris.
- **Squeaking Noises:** Squeaking can often be resolved by re-tightening all fasteners. If the issue persists, consider applying a small amount of lubricant to metal-on-metal contact points, if any, or checking the mattress and slats for proper seating.
- **Mattress Fit:** Ensure your mattress dimensions are compatible with the bed frame (90x200cm or 90x190cm).
- **Weight Capacity:** Do not exceed the maximum load capacity of 100KG for the bed. Exceeding this limit can compromise the bed's structural integrity and safety.
