USHA 4213F PTC

Usha OFR 13 Fin 2900 Watt 4213 F PTC Room Heater with Fan Heater

Model: 4213F PTC | Brand: USHA

Introduction

Thank you for choosing the Usha OFR 13 Fin 2900 Watt 4213 F PTC Room Heater. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new appliance. Please read these instructions carefully before use and retain them for future reference.

Important Safety Instructions

- Always ensure the heater is placed on a firm, level surface.
- Do not cover the heater or obstruct its air inlets/outlets. This can lead to overheating.
- Keep flammable materials such as furniture, curtains, and bedding at least 1 meter (3 feet) away from the heater.
- Do not use the heater in bathrooms, laundry areas, or similar indoor locations where it may come into contact with water.
- Unplug the heater when not in use or before cleaning.
- This appliance is equipped with a **Tilt Over Switch** for safety, which automatically turns off the heater if it tips over.
- It also features **Overheat Protection**, which shuts down the unit if it reaches an unsafe temperature.
- Do not operate any heater with a damaged cord or plug, or after the heater malfunctions or has been dropped or damaged in any manner.

What's in the Box

Upon unpacking, please verify that all components are present and undamaged:

- Usha Oil Filled Radiator (OFR) Heater Unit
- Wheel Set (4 wheels)
- Instruction Manual

Setup and Assembly

Attaching the Castor Wheels

1. Carefully invert the heater unit, ensuring it is stable.
2. Locate the wheel mounting points at the base of the heater.
3. Insert each castor wheel stem into its designated hole until it clicks securely into place.
4. Return the heater to an upright position. The **Recess Handle and Castor Wheels** facilitate easy portability.

Placement

- Place the heater on a stable, level surface, away from direct sunlight or heat sources.
- Ensure adequate clearance around the heater for proper air circulation (minimum 1 meter from walls and furniture).

- Connect the power cord to a suitable electrical outlet. The integrated **Cord Winder** allows for easy storage when not in use.

The Usha OFR heater positioned in a modern living room next to a sofa, demonstrating its compact design and suitability for home environments.

Operating Instructions

Control Panel Overview

The heater features a user-friendly control panel with a thermostat dial and power settings.

Close-up of the adjustable thermostat dial on the Usha OFR heater, allowing users to set desired room temperature.

Powering On and Setting Temperature

1. Plug the heater into a grounded electrical outlet.
2. Turn the power switch to the 'ON' position.
3. Adjust the **Adjustable Thermostat** dial to your desired heat level. The heater will cycle on and off to maintain the set temperature.

Using the PTC Fan Heater

This model includes a PTC (Positive Temperature Coefficient) fan heater for faster heating of the room.

- Locate the PTC fan heater switch on the control panel.
- Turn this switch 'ON' to activate the fan heater for additional warmth.
- The PTC fan heater operates independently or in conjunction with the oil-filled radiator elements.

Maintenance

Cleaning

- Always unplug the heater and allow it to cool completely before cleaning.
- Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- Ensure no water enters the internal components of the heater.
- The **Powder Coated fins** are designed for rust protection and can be wiped clean.

Storage

- When storing the heater, ensure it is clean and dry.
- Use the integrated **Cord Winder** for neat cable management.

- Store the heater in a cool, dry place, protected from dust.

Troubleshooting

If you experience issues with your heater, please consult the following table before contacting customer service:

Problem	Possible Cause	Solution
Heater does not turn on.	No power supply. Thermostat set too low. Overheat protection activated. Tip-over switch activated.	Check power plug and outlet. Increase thermostat setting. Unplug, let cool for 30 mins, then restart. Ensure heater is upright on a level surface.

Problem	Possible Cause	Solution
Heater produces insufficient heat.	Thermostat set too low. Room size too large for heater. Obstruction of air vents.	Increase thermostat setting. Refer to specifications for recommended room size. Ensure vents are clear.
Unusual noise or smell.	New unit smell (temporary). Foreign object inside.	This is normal for initial use. Unplug immediately and contact customer service.
