## MAINTENANCE

To ensure the longevity and optimal performance of your INTERGREAT Storage Cabinet, follow these maintenance guidelines:

- **Cleaning:** Wipe down the cabinet surfaces with a soft, damp cloth. For stubborn dirt, a mild soap solution can be used. Avoid abrasive cleaners or harsh chemicals, as they may damage the powder coat finish.
- **Rust Prevention:** The cabinet features a powder coat for anti-rust properties. However, avoid prolonged exposure to excessive moisture or corrosive substances. If used in a high-humidity environment, ensure good ventilation.
- **Load Capacity:** Do not exceed the maximum weight capacity of 180 lbs per shelf or the total cabinet weight limit of 900 lbs. Distribute weight evenly across shelves to prevent warping or damage.
- **Lock Mechanism:** Periodically check the lock and hinges for smooth operation. Apply a small amount of lubricant if necessary.

- **Stability:** Regularly check that the cabinet is stable and securely anchored to the wall, especially if it is frequently moved or heavily loaded.
