SETUP AND INSTALLATION

The Dimplex Slim Electric Fireplace is designed for either built-in (flush) installation or wall-mounted installation. A wall mount installation bracket is included.

Pre-Installation Checklist:

- Ensure the installation location is suitable for the fireplace dimensions (60 inches wide).
- Verify power supply requirements (120V) and ensure a dedicated circuit is available if hardwiring.
- Unpack all components and check for any damage. Retain packaging for future transport or returns.
- Gather necessary tools: measuring tape, level, drill, screwdriver, wire strippers (for hardwire).

Built-in Installation (Flush Mount):

1. Construct a framed opening that accommodates the fireplace dimensions. The shallow 3.75-inch depth allows it to sit flush into standard 2-inch x 4-inch framing.
2. Ensure proper ventilation clearances as specified in the full installation guide (refer to manufacturer's website for detailed diagrams).
3. Slide the fireplace into the framed opening. Secure it using the provided mounting screws through the designated holes on the unit's frame.
4. Connect the electrical wiring. The unit can be hardwired or connected via an optional 120V plug-in cord kit. Consult a qualified electrician for hardwiring.
5. Install the acrylic crystal ember bed by carefully placing the crystals into the designated tray at the bottom of the firebox.

Wall Mount Installation:

1. Identify a suitable wall location, ensuring it can support the weight of the unit (88.3 pounds).
2. Attach the included wall mount bracket to the wall studs using appropriate fasteners. Use a level to ensure the bracket is perfectly horizontal.
3. Carefully lift the fireplace and hook it onto the wall mount bracket. Ensure it is securely seated.
4. Connect the electrical wiring.
5. Install the acrylic crystal ember bed.

- **Exterior:** Wipe the exterior surfaces with a soft, damp cloth. Do not use abrasive cleaners or sprays.
- **Glass Panel:** Clean the glass panel with a soft cloth and a non-abrasive glass cleaner. Avoid spraying cleaner directly onto the unit.
- **Air Intakes/Outlets:** Periodically vacuum or brush dust from the air intake and exhaust openings to ensure proper airflow and prevent overheating.

Ember Bed:

- The acrylic crystals can be removed and gently rinsed with water if they accumulate dust or debris. Ensure they are completely dry before placing them back into the unit.
