5. MAINTENANCE

5.1 Cleaning the Keyboard

To maintain optimal performance and appearance, regularly clean your keyboard:

- Disconnect the keyboard from your device before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe down the keycaps and surface.
- For dust and debris between keys, use compressed air.
- The color-blocking keycaps are made of oil-resistant ABS double-injection material, ensuring clear fonts and resistance to fading.

5.2 Cable Care

The Pro Custom Coiled USB-C Cable is made of durable and highly elastic TPU material. To prolong its lifespan:

- Avoid sharp bends or excessive pulling on the cable.
- Keep the cable free from tangles to maintain its aesthetic and functional integrity.

6. TROUBLESHOOTING

If you encounter issues with your Yindiao T8 keyboard, please refer to the following common solutions:

- **Keyboard Not Responding**: Ensure the USB-C cable is securely connected to both the keyboard and your device. Try connecting to a different USB port or a different device to rule out port issues.
- **RGB Backlighting Not Working**: Check if the backlight is turned off using the **Fn + \|** key combination. Ensure the keyboard is properly connected.
- **Keys Not Registering** / **"Dead Switches"**: While the keyboard features durable blue switches, if a specific key consistently fails to register, ensure no debris is lodged under the keycap. If the issue persists, contact customer support.
- **Compatibility Issues with PS4/Xbox**: As noted, PS4 and Xbox ONE devices may require an external adapter for full functionality. Ensure you are using a compatible adapter if necessary.
- **Software/App Not Detecting Device**: If using third-party software for customization (not officially supported by this manual), ensure the keyboard is properly connected and recognized by your operating system first.
