Maintenance

Proper care will extend the life and appearance of your bed frame.

- **Cleaning:** For the faux leather and metal frame, wipe with a soft, damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Fabric Care:** The product care instructions specify "Dry Clean Only" for the upholstered parts. For general cleaning, a simple wipe down with a damp cloth is usually sufficient for faux leather.
- **Regular Checks:** Periodically check all bolts and connections to ensure they remain tight. Retighten if necessary to maintain stability and prevent squeaking.
- **Weight Distribution:** Distribute weight evenly on the bed frame to prevent stress on individual slats or frame components.

Troubleshooting

If you encounter any issues with your ANCTOR Queen Bed Frame, refer to the following common solutions:

Problem	Possible Cause	Solution
Squeaking Noise	Loose bolts or connections; friction between metal parts.	Ensure all assembly bolts are securely tightened. Apply a small amount of lubricant (e.g., silicone spray) to connection points if squeaking persists.
Bed Frame Instability	Improper assembly; loose connections; uneven floor.	Re-check all assembly steps and tighten all bolts. Ensure the bed is on a level surface.
Mattress Slippage	Mattress not properly seated; footboard not preventing movement.	Ensure the mattress is centered on the frame. The footboard is designed to help prevent slippage. Consider using a non-slip mattress pad if needed.
Charging Station Not Working	Power cord not plugged in; faulty outlet; device issue.	Verify the power cord is fully plugged into a working wall outlet. Test the outlet with another device. Try a different charging cable or device.

If the problem persists after attempting these solutions, please contact ANCTOR customer support.
