## MAINTENANCE

To ensure the longevity and appearance of your DUMEE Twin Day Bed Frame, follow these maintenance guidelines:

- **Cleaning:** Wipe the metal frame with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the finish.
- **Hardware Check:** Periodically check all bolts and screws to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent creaking.
- **Weight Distribution:** Distribute weight evenly across the bed frame to prevent stress on specific areas.

## TROUBLESHOOTING

If you encounter any issues with your day bed frame, consider the following common solutions:

- **Squeaking or Creaking:** This is often caused by loose hardware. Re-tighten all bolts and screws. Ensure the frame is on a level surface.

- **Instability:** Verify that all connections are secure and that the frame is assembled according to the instructions. Check for any bent or damaged components.
- **Mattress Fit:** Ensure you are using a standard twin-sized mattress. If the mattress does not fit correctly, double-check the frame dimensions against your mattress size.

If problems persist after attempting these solutions, please contact customer support.
