3. SETUP

3.1. Initial Charging

Before first use, fully charge the clipper. Connect the USB charger cable to the charging stand or directly to the clipper, then plug into a suitable USB power adapter. The digital display will indicate charging progress. A full charge is recommended for optimal performance.

3.2. Blade Oiling

Apply a few drops of the included oil to the blades before each use. This ensures smooth operation and prolongs blade life. Turn the clipper on for a few seconds to distribute the oil evenly.

3.3. Attaching Guide Combs

Select the desired guide comb based on the hair length required. The combs are color-coded for easy identification. Align the comb with the clipper blade and snap it securely into place.

4. OPERATING INSTRUCTIONS

1. Fully charge the clipper before the first use.
2. Attach the desired guide comb for the desired hair length.
3. Apply oil to the blades for smooth operation.
4. Press the power button to turn on the clipper.
5. Use the clipper on dry hair.
6. Move the clipper slowly and steadily against the direction of hair growth.
7. Clean the clipper after each use.

4.1. Taper Lever Adjustment

The 5-clicking lever arm allows for precise adjustment of the blade length without changing guide combs, ideal for blending and fading techniques.

5. MAINTENANCE

5.1. Cleaning

After each use, turn off the clipper and remove any attached guide combs. Use the included cleaning brush to remove loose hair from the blades and the clipper body. For a more thorough clean, the blades can be carefully detached and rinsed under water, ensuring they are completely dry before reattaching.

5.2. Oiling

Regular oiling of the blades is crucial for maintaining cutting performance and preventing rust. Apply 2-3 drops of clipper oil across the top of the blades and along the side rails after every few uses or as needed. Turn the clipper on for a few seconds to distribute the oil.

5.3. Storage

Store the clipper in a dry, cool place, away from direct sunlight and moisture. Ensure the protection cap is on the blades to prevent damage. When not in use, the clipper can be stored on its charging stand.

6. TROUBLESHOOTING

- **Clipper not turning on:** Ensure the battery is charged. Connect to the charger and check the digital display.
- **Clipper pulling hair:** This often indicates dull blades or insufficient oiling. Clean and oil the blades. If the issue persists, blade replacement may be necessary.
- **Reduced battery life:** Ensure the clipper is fully charged before use. Over time, battery capacity may decrease.
- **Unusual noise or vibration:** Turn off the clipper immediately. Check for any obstructions in the blades or internal components. If the issue continues, contact customer support.

For further assistance, please refer to the support section or contact TPOB customer service.
