YEEHUNG W221-B

YEEHUNG W221 12.3" Android Screen Black Cover Instruction Manual

MODEL: W221-B

1. Product Overview

This cover is designed specifically for the YeeHung W221 12.3" Android Screen (ASIN: B0B885NRBB). It is intended for vehicles with a black interior dashboard in the W221 model range.

Key features include:

- Constructed from ABS high-temperature resistant plastic material.
- Surface wrapped with automotive interior leather, designed to match the original car's aesthetic.
- Direct replacement for the original dashboard cover accessory during installation.

3. Installation Steps

3.1. Dashboard Cover Replacement

The YEEHUNG W221 12.3" Android Screen Black Cover replaces your vehicle's original dashboard cover accessory. The following steps outline the general process:

1. Carefully remove the existing dashboard cover. This typically involves unscrewing fixing screws and gently prying the cover using a trim removal tool to avoid damage.
2. Align the new YEEHUNG black cover with the dashboard opening.
3. Secure the new cover by re-inserting and tightening the fixing screws.
4. Ensure all edges are properly seated and flush with the dashboard.

Figure 4: Visual comparison of the dashboard before and after installing the new cover with the Android screen.

3.2. Optional Skin Wrapping (Professional Recommendation)

The surface of this cover is designed to be wrapped with automotive interior leather to match your car's style. While it is possible to attempt this yourself, it is highly recommended to have this process performed by professionals at an auto trim store for optimal results and a smooth finish. Manual operation may not achieve the desired flatness.

If you choose to proceed with skin wrapping, you will need special glue for car leather, a brush, scissors, and a sharp art knife. The process involves cutting a suitable piece of leather, applying glue to both the cover and the leather, and carefully wrapping and trimming the leather to fit the cover's contours.
