SETUP AND ASSEMBLY INSTRUCTIONS

Assembly of the Quarte Multifunctional Loft Bed requires careful attention to detail. It is recommended that **two adults** participate in the assembly process. Please allocate sufficient space for unpacking and assembling the bed components.

1. Preparation:

- Clear a large, open area for assembly.
- Unpack all three boxes and lay out all components. Identify each part by comparing it with the parts list in the separate instruction booklet. Note that some pieces may not have clear labels, requiring careful identification based on shape and size.
- Separate all hardware (screws, bolts, etc.) and match them to the hardware list.

2. **Follow the Assembly Booklet:** Refer to the dedicated assembly instructions booklet included in your package for step-by-step guidance. The booklet contains diagrams and specific instructions for each stage of construction.

3. **Component Identification:** Pay close attention to the orientation of each piece as shown in the diagrams. Incorrect orientation can lead to instability or difficulty in completing assembly.

4. **Fasteners:** Use the correct fasteners for each step. Overtightening screws can damage the wood. If a screw feels too tight, re-check the alignment and ensure you are using the correct screw type.

5. **Staircase and Storage:** Assemble the staircase and integrated storage units according to the instructions. These sections often involve multiple smaller parts.

6. **Final Tightening:** Once the entire structure is assembled, go back and gently tighten all bolts and screws to ensure maximum stability. Do not overtighten.
