7. MAINTENANCE

To maintain the appearance and longevity of your VEIKOU Bamboo Bathroom Floor Storage Cabinet, follow these care instructions:

- **Cleaning:** Wipe the cabinet surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these can damage the bamboo and its water-resistant finish.
- **Spills:** Promptly wipe up any spills to prevent water damage, especially on the top surface. The water-resistant painting helps protect against moisture, but prolonged exposure should be avoided.
- **Environment:** While designed for bathrooms, avoid placing the cabinet in areas with excessive humidity or direct sunlight for extended periods, as this can affect the bamboo's integrity over time.
- **Inspection:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary to maintain structural stability.

8. TROUBLESHOOTING

If you encounter any issues with your VEIKOU storage cabinet, please refer to the following common solutions:

- **Wobbly Cabinet:** Ensure the cabinet is placed on a level surface. Check all assembly screws and tighten them if loose. If the floor is uneven, use furniture pads or shims under the legs to stabilize.
- **Drawers Sticking:** Verify that the drawer slides are correctly installed and free from obstructions. Ensure no items inside the drawer are preventing it from closing smoothly.
- **Door Not Closing Properly:** Check if the magnetic stopper is aligned correctly. Ensure the door hinges are securely fastened and adjusted if necessary.
- **Missing Parts:** If you find any parts missing during assembly, please contact VEIKOU customer support immediately for assistance.
